

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 6, 2018 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial Attack Activity: Moderate (279) new fires
 New large incidents: 10
 Large fires contained: 11
 Uncontained large fires:** 36
 Area Command teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 4
 Type 2 IMTs committed: 6

Nationally, there are 24 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 airtankers and support personnel from the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) along with one MAFFS C-130 airtanker and support personnel each from the 153rd Airlift Wing (Wyoming, Air National Guard) and 152nd Airlift Wing (Nevada, Air National Guard) have been deployed to Colorado Springs, CO in support of wildland fire operations.

Rocky Mountain Area (PL 4)

New fires:	49
New large incidents:	0
Uncontained large fires:	8
NIMOs committed:	1
Type 1 Teams committed:	1
Type 2 Teams committed:	3

Spring Creek, Costilla County. IMT 2 (Greer) and IMT 2 (Esperance). Nine miles northeast of Fort Garland, CO. Timber, brush and tall grass. Moderate fire behavior with short crown runs, group torching and long-range spotting. Several communities threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Lake Christine, Eagle County. IMT 2 (Almas). One mile northwest of Basalt, CO. Timber and brush. Extreme fire behavior with crowning, wind-driven runs and spotting. Numerous structures, energy and communication infrastructure threatened. Road, area and trail closures in effect.

Weston Pass, Pike-San Isabel NF. IMT 1 (Pechota). IMT is also managing the Chateau fire. Nine miles southwest of Fairplay, CO. Timber and brush. Active fire behavior with crowning and flanking. Numerous residences threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Chateau, Teller County. Transfer of command from IMT 1 (Pechota) back to the local unit will occur tomorrow. Seven miles northwest of Cripple Creek, CO. Closed timber litter and tall grass. Minimal fire behavior with backing, creeping and smoldering. Numerous residences threatened. Road, area and trail closures in effect.

Divide, Moffat County. Twenty-three miles northwest of Craig, CO. Brush and grass. Active fire behavior with running and flanking. Residences and sage-grouse habitat threatened. Evacuations and road closures in effect.

Badger Creek, Medicine Bow-Routt NF. Two miles northwest of Mountain Home, WY. Timber. Moderate fire behavior with creeping and smoldering. Numerous structures threatened. Area and trail closures in effect. Precipitation occurred over the fire area yesterday.

416, San Juan NF. NIMO (Reinarz). Thirteen miles north of Durango, CO. Timber and brush. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Burro, San Juan NF. Fourteen miles south of Rico, CO. Timber. Minimal fire behavior with torching, creeping and smoldering. Road, area and trail closures in effect.

Predictive Services Discussion: The massive ridge of high pressure over the West will begin to reach its peak intensity for this cycle today. Temperatures will soar in most areas to be above 100 degrees except across the Pacific Northwest and western portions of the Northern Rockies where temperatures will be near normal. Afternoon humidities will be in the single digits across much of the Great Basin. Breezy southwesterly winds could be a concern across portions of eastern Oregon, northeastern California and Nevada in the afternoon. Scattered wet storms are expected across the Four Corners. Localized flash flooding will be possible across portions of central Arizona in prone areas. Elsewhere across the Lower 48, scattered storms will be possible across the South. Temperatures will be less hot than previous days.

In Alaska, cooler than normal temperatures are expected as high pressure north of the Bering Strait creates a cool northerly flow over the Interior. A few showers will be possible near Tok as a low pressure area begins to form and drift southwestward.

Day 7 Conclusion

Week of Remembrance June 30-July 6

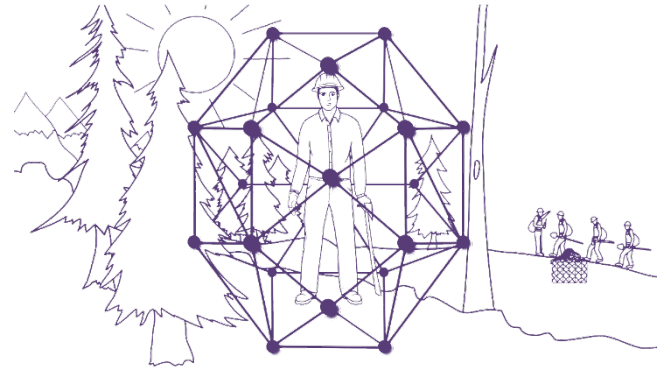

This Week of Remembrance is dedicated to all those who have fallen in the line of duty and is intended to serve as an opportunity to renew our commitment to the health, wellness and safety of wildland firefighters.

On July 6, 1994 the South Canyon fire claimed the lives of 14 wildland firefighters. Our tribute to those lives lost that day on Storm King Mountain closes out a week of collectively remembering and honoring all the lives lost during wildland fires. It is an opportunity to learn from the past and implement changes that will hopefully result in safer outcomes for our workforce. Over time the lessons we learn and share from accidents and fatalities have led to significant improvements in our training, leadership, risk assessment and operational practices.

This week has focused on medevacs and the changes implemented since the death of Andy Palmer. Significant changes in medical operations and resources have resulted from this incident. However, we must not rely on these changes as the only answer. Our duty is to build *margin* into our planning that helps us to remain flexible in our actions and reduces the chances of needing a medevac.

What **is** *margin*? Think of margin as the room we have to operate safely. We have tools such as our IRPG, the Redbook, LCES and risk management that help us assess and influence our degree of margin. Margin is **not** intended to be just another tool, but, an overarching framework in which these tools are applied.

Margin includes the role of the firefighter in the creation of safety. For example, doing our daily PM checks on our vehicles and addressing any issues immediately allows for safer conditions when driving. Training gives us knowledge to do our jobs. Having a radio on the line means you have communication, both the ability to communicate and to hear the operations and actions that are occurring around you. These types of factors increase our margin, create a stronger environment of safety and reduce the chance of unintended outcomes.

When it comes to operations we need to be diligent in planning for and continuously reassessing the potential of the worst possible outcomes such as a medevac. Imagine worst case scenarios and ways to build margin into the plan to reduce the possibilities of such an incident. We are unable to control our environment; the weather changes, the slope is steep, the fuels are heavy, but we **can** control our actions and planning.

The idea of continuous reassessment of the amount of margin should be a conversation among multiple people and is key to assessing and managing the level of margin as the environment (and our understanding of our environment) changes through time. **In the end, margin is a way to easily talk about all the complex stuff in a simple way. i.e. "I feel we have more/less margin" right now with this plan.**

Action: [Watch this short video on Margin](#) then discuss the following as a crew

1. How can you build margin to reduce the need for a medical evacuation on the fireline?
2. How much margin is enough margin?
3. How can you utilize the information on page 19 of the IRPG, How to Properly Refuse Risk, to increase Margin when on the fireline?
4. How does risk tolerance effect Margin?
