

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, July 8, 2018 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial Attack Activity:	Light (166) new fires
New large incidents:	6
Large fires contained:	2
Uncontained large fires:**	38
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	8

Nationally, there are 23 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 airtankers and support personnel from the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) along with one MAFFS C-130 airtanker and support personnel each from the 153rd Airlift Wing (Wyoming, Air National Guard) and 152nd Airlift Wing (Nevada, Air National Guard) have been deployed to Colorado Springs, CO in support of wildland fire operations.

## **Rocky Mountain Area (PL 4)**

New fires:	23
New large incidents:	2
Uncontained large fires:	10
NIMOs committed:	1
Type 1 Teams committed:	1
Type 2 Teams committed:	3

**Spring Creek**, Costilla County. IMT 2 (Greer) and IMT 2 (Esperance). Nine miles northeast of Fort Garland, CO. Timber, brush and tall grass. Active fire behavior with uphill runs, group torching and short-range spotting. Several communities, communications and railroad infrastructure threatened. Evacuations, road, area and trail closures in effect.

**Lake Christine**, Eagle County. IMT 2 (Almas). One mile northwest of Basalt, CO. Timber and brush. Moderate fire behavior with isolated torching, creeping and smoldering. Numerous structures, energy and communication infrastructure threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Weston Pass**, Pike-San Isabel NF. IMT 1 (Pechota). Nine miles southwest of Fairplay, CO. Timber and brush. Moderate fire behavior with flanking, torching and creeping. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

**Divide**, Moffat County. Twenty-three miles northwest of Craig, CO. Brush and grass. Minimal fire behavior. Structures and sage-grouse habitat threatened. Evacuations have been lifted. Road and area closures in effect.

\* **Thornburg**, Moffat County. Four miles northwest of Maybell, CO. Short grass. Active fire behavior with wind-driven runs. Structures and sage-grouse habitat threatened.

**416**, San Juan NF. Transfer of command from NIMO (Reinarz) back to the local unit will occur on 7/10. Thirteen miles north of Durango, CO. Timber and brush. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Badger Creek**, Medicine Bow-Routt NF. Two miles northwest of Mountain Home, WY. Timber. Moderate fire behavior with isolated torching, creeping and smoldering. Numerous structures threatened. Road, area and trail closures in effect.

**Chateau**, Teller County. Seven miles northwest of Cripple Creek, CO. Closed timber litter and tall grass. Minimal fire behavior. Numerous residences threatened. Road, area and trail closures in effect.

\* **Tabeguache**, Grand Mesa, Uncompahgre and Gunnison NF. Thirty miles west of Montrose, CO. Timber, litter and understory. Active fire behavior with running, short crown runs and spotting. Road closure in effect.

**Burro**, San Juan NF. Fourteen miles south of Rico, CO. Timber. Minimal fire behavior. Road, area and trail closures in effect.

**Predictive Services Discussion:** The enormous ridge of high pressure will flatten out in such a manner that it incorporates all of the CONUS except western Washington and Oregon, making the entire country quite hot except across the far western portions of the Pacific Northwest and along the Canadian Border. Within the ridge, significant monsoonal moisture will stream northward across the Southwest, through the Central Rockies and into eastern Montana. Most storms will be wet; however, expect the storms that develop along the periphery of the moisture plume to be mostly dry. Scattered storms will also be possible along the Gulf Coast as a stationary front lingers over the region. In Alaska, low pressure areas over Bristol Bay and in the central Arctic Ocean will keep most of the state cool and moist. However, a ridge of high pressure over the central Interior will keep that area dry. Scattered storms will be possible across the Upper Yukon, which could lead to new starts.

## Smoke Exposure

*Firefighter Health & First Aid*

Exposure to smoke during fire operations can be a significant safety concern. Research has shown that smoke exposure on prescribed fires, especially in the holding and ignition positions, often exceeds that on wildfires. There are many precautions that can be taken to reduce personnel from exposure to smoke.

- **Planning:** Smoke exposure needs to be considered when planning suppression tactics and prescribed fires. Simple actions can mitigate smoke exposures, such as:
  - Altering line locations can have a significant impact on smoke exposure.
  - Placing firelines in areas of lighter fuels or moving lines to roads or other barriers that will require less holding, patrol and mop-up will significantly reduce the smoke exposure to personnel.
  - Use flanking attack as opposed to head attack (where appropriate) in heavy smoke situations.
  - Check fire behavior forecasts for smoke and inversion potential.
  - In heavy smoke, give up acres to gain control.
  
- **Implementation:** Many techniques can help reduce the exposure of personnel to heavy smoke, such as:
  - Rotating people out of the heaviest smoke area may be the single most effective method.
  - Locate camps and incident command posts in areas that are not prone to inversions.
  - Minimize snag falling, consistent with safety concerns, to avoid putting heavy fuels on the ground that will require mop-up.
  - Changing firing patterns and pre-burning (black lining) during less severe conditions can greatly reduce exposure to smoke.
  - The use of retardant, foam or sprinklers can also significantly reduce the workload and exposure time for holding crews.
