## National Interagency Coordination Center <br> Incident Management Situation Report

Friday, July 13, 2018 - 0530 MT
National Preparedness Level 3

## National Fire Activity

Initial Attack Activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (168) new fires
4
5

Nationally, there are 21 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

Predictive Services Discussion: The Four Corners high pressure ridge will amplify over the west and will lead to the hottest temperatures of the year in many locations. Potentially offsetting some of the heat will be slightly higher dew points which will lead to less critical humidity levels across the Great Basin up through Nevada and Utah. This will be a result of the ongoing daily convection. Colorado and the Southwest will also continue to experience substantial monsoonal convection as well. Areas of concern will be across the Sierra, Siskiyou, Oregon Cascades, Ochoco, and Steen Mountain Ranges where a mix of dry and wet storms will likely start more than a few fires. In the East, a passing cold front will bring slightly cooler temperatures to the Great Lakes Region.

In Alaska, a broad area of low pressure south of Nome will extend a frontal boundary inland across the Interior. Scattered showers and storms are expected mainly from Fairbanks east and south into the Yukon Territory. A few strikes will also be possible across the Brooks Range and on the North Slope.

LE D Time
Leading Up
Leadership Category

Looking out for our people includes not only those who work for us but also our leaders and peers. Leadership is about influencing others to accomplish tasks that are in the best interest of our organization which often means influencing those above us and leading up. Similarly, we are open to upward leadership-and, in fact, encourage and reward it.

Fire leaders are expected to lead in many directions, an expectation that increases complexity and risk.
Summoning the courage needed to intervene and influence peers or leaders above can be difficult, especially if providing unwelcome feedback about behavior or pointing out an alternative to a potentially bad decision.

In high-risk environments, no one can afford to assume that anyone has all the answers.
To build the kind of healthy and resilient culture required in the wildland fire service, we lead upholding our leaders accountable, providing unvarnished situational awareness in challenging situations, and offering unbiased and viable alternatives.

## Discussion Points:

- How can we practice leading up?
- Describe a situation where leading up took place. How was the situation affected?
- Describe a situation where there was opportunity for leading up but it was not done. How was the situation affected?
- Discuss leading "laterally": influencing peers or those with similar responsibilities.
