Predictive Services Discussion: A weak cold front moving east across the Northern Rockies will push the monsoonal plume of convective moisture south to be more focused over extreme southern Idaho and southern Oregon. Points south and east of this focus point will see mostly scattered wet storms. Breezy post frontal winds are expected across eastern Montana while a thermal trough builds across the central valley of California. Temperatures across the West will remain well above average. Monsoonal convection along the southern Continental Divide will provide relief to fuels across New Mexico and Arizona. In the East, tropical moisture will become trapped in the high pressure ridge over the Lower Mississippi River Valley. Expect hot and humid conditions along with scattered storms in the afternoon. In Alaska, scattered showers will be possible across the Interior as a low pressure area moves east from Bristol Bay on shore. The upper Yukon Basin will remain dry however.

# In Country Not Seen In Daylight 

Operational Engagement Category

Often firefighters arrive on a fire after dark. This is recognized as Watchout Situation \#2. Before safely fighting fire in country not seen in daylight, firefighters must be able to answer the following questions:

- Can the resources you are replacing give you a thorough briefing? Identify whom you might get information from. Can you meet up with the departing overhead/resource leaders?
- Can you observe the area/use scouts? List ways you could observe the area you need to work.
- Have escape routes and safety zones been thoroughly scouted and marked for night use? Talk about what constitutes an escape route and a safety zone; who would identify them; and in what ways might they be marked.
- Have potential dangers been located; can they be mitigated? What are the dangers associated with Watchout Situation \#2? How can they be worked around?
- Reduce the risks by:
- Posting lookouts.
- Checking communications.
- Retreat if you have doubts about your escape routes or safety zones, or the situation becomes too complex. Give examples of arriving on a fire after dark and what was done to allow you to fight fire safely in country not seen in daylight.
- Identifying prominent geographic features.
