

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 15, 2018 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial Attack Activity:	Light (148) new fires
New large incidents:	7
Large fires contained:	3
Uncontained large fires:**	35
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Nationally, there are 21 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

On July 14th a firefighter with CAL FIRE Madera-Mariposa-Merced Unit was fatally injured while assigned to the Ferguson fire on the Sierra National Forest. The firefighting community extends condolences to the friends and family of the deceased.

Predictive Services Discussion: High pressure over the West will keep scattered showers associated with the summer monsoon active across the Four Corners, the southern Great Basin, and the southern and central Rockies. Most storms in the area will produce around a quarter to a half an inch of rain but a few could produce one to two inches of rain. Widely scattered thunderstorms will also develop over Northern California, southern Oregon, northern Nevada, and southwestern Idaho. These storms will be a mix of little to no rain to some producing a few tenths of an inch. Farther north, westerly flow aloft will produce breezy conditions across the northern Rockies behind a dry front that moves through Montana into Wyoming. In the central and eastern U.S., scattered thunderstorms will develop from the central Plains to the Appalachians and south to the Gulf Coast. Hot weather will cover most of the lower 48 except warm conditions across the northern Rockies, the northern Plains, and New England. In Alaska, scattered showers and thunderstorms will form over most of the state. Temperatures will continue mild except warm in the central and eastern interior.
