

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, July 21, 2018 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial Attack Activity:	Light (126) new fires
New large incidents:	6
Large fires contained:	7
Uncontained large fires:**	40
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	9

Nationally, there are 25 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

The U.S. has mobilized 12 federal wildland firefighters to support fire suppression efforts in Ontario, Canada.

**Northwest Area (PL 3)**

New fires:	19
New large incidents:	1
Uncontained large fires:	18
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7

**Substation**, Wasco County. IMT 1 (Schulte). Started on private land five miles south of The Dalles, OR. Brush and tall grass. Minimal fire behavior. Numerous structures threatened. Evacuations, road and area closures in effect.

**Garner Complex** (5 fires), Grant Pass Unit, ODF. ODF IMT 1 (Cline). Four miles east of Cave Junction, OR. Timber and medium logging slash. Active fire behavior with flanking, backing and group torching. Numerous residences threatened. Evacuations and road closures in effect.

**South Umpqua Complex** (3 fires), Umpqua NF. IMT 2 (Sheldon). Thirty miles southeast of Myrtle Creek, OR. Timber. Active fire behavior with uphill runs, group torching and short-range spotting. Residences threatened. Road and trail closures in effect.

**Natchez**, Rogue River-Siskiyou NF. IMT 2 (Lawson). IMT is also managing the Klondike and Granite incidents. Fifteen miles southeast of Cave Junction, OR. Timber, chaparral and hardwood litter. Active fire behavior with torching, flanking and backing. Structures and energy infrastructure threatened.

**Granite**, Rogue River-Siskiyou NF. IMT 1 (Livingston) mobilizing. Nine miles northwest of Selma, OR. Brush and hardwood litter. Active fire behavior with uphill runs, backing and flanking. Residences threatened.

**Klondike**, Rogue River-Siskiyou NF. IMT 1 (Livingston) mobilizing. Nine miles northwest of Selma, OR. Hardwood litter and brush. Active fire behavior with uphill runs, flanking and backing. Structures threatened. Reduction in acreage due to more accurate mapping.

**Hendrix**, Rogue River-Siskiyou NF. IMT 2 (Harrod). Three miles southwest of Ashland, OR. Timber and medium logging slash. Active fire behavior with single-tree torching. Residences threatened. Evacuations in effect.

**Timber Crater 6**, Crater Lake National Park, NPS. IMT 2 (Goff). Twenty miles southwest Chemult, OR. Timber. Moderate fire behavior with short-range spotting, isolated torching and flanking.

**Sugar Pine**, Rogue River-Siskiyou NF. IMT 2 (Gales). IMT is also managing the Union incident. Twelve miles northwest of Prospect, OR. Timber. Moderate fire behavior with single-tree torching, flanking and backing.

\* **Union**, Rogue River-Siskiyou NF. Ten miles northeast of Prospect OR. Timber. Moderate fire behavior with backing, single-tree torching and uphill runs.

**Cemetery**, Prineville District, BLM. Transfer of command from IMT 2 (Johnson) back to the local unit will occur tomorrow. Thirty-two miles southeast of Prineville, OR. Timber, brush and tall grass. Minimal fire behavior. Sage-grouse habitat threatened.

**Boylston**, Southeast Region, Washington DNR. IMT 2 (Knerr). Thirteen miles east of Ellensburg, WA. Brush and tall grass. No new information.

**Buckshot**, Spokane District, BLM. Started on private land two miles south of Mattawa, WA. Brush and tall grass. Moderate fire behavior. Numerous structures threatened. Road and area closures in effect. Reduction in acreage due to more accurate mapping.

**Upriver Beacon**, Northeast Region, Washington DNR. Three miles northeast of Spokane, WA. Timber, brush and short grass. Minimal fire behavior. Numerous residences threatened. Trail and area closures in effect.

**L RD SW**, Mid-Columbia National Wildlife Refuge Complex, FWS. Nine miles southeast of Mattawa, WA. Brush and grass. Minimal fire behavior. Road closures in effect. Sage-grouse habitat threatened. Last narrative report unless significant activity occurs.

**Predictive Services Discussion:** The low pressure area over southern British Columbia will slowly begin moving east. As it does so, monsoonal moisture will be drawn northward from the Four Corners into Wyoming, eastern Idaho, and Montana. Expect scattered thunderstorms to develop along a slowly eastward moving cold front that stretches from northeastern Montana southwest in to northeastern California. Storms will be a mix of wet and dry. Elsewhere, expect cooler but breezy conditions across the Pacific Northwest in the post frontal westerly flow. The heat will continue across California and the Four Corners as will the development of mainly afternoon convection, mostly wet across the Southwest and the Sierras. In the East, expect overall cooler conditions. Showers and storms will be present from Pennsylvania south to the Gulf coast. New England will remain mostly dry as will Texas.

## Hazard Tree Felling Safety Tips 1

*Felling Safety Category*

Felling a hazard tree requires accurate risk assessment and complexity analysis, and demands the sawyer's full situational awareness. In all cases, remember to establish and maintain a secure felling area.

Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Degree of hazard varies with tree size, species, and type/location of defect:

- Stem defects resulting in tree failure, i.e., collapse;
- Weakened sapwood resulting in loss of control when felling trees & limits solid wood for wedging;
- Overhead hazards, i.e., dead or hanging limbs falling on the faller.

### **Indicators of potential felling hazards:**

**Dead Limbs:** limbs of all sizes and species with decay evident cracking, or loose hung-up limbs. Avoid working under overhead hazards.

**Witches Broom:** caused by mistletoe infection, limbs can grow very large and heavy (200+ lbs).

**Split Trunk:** cracked trunk from frost, lightning or wind. Visible evidence of advanced decay indicates serious weakness where the tree could fail.

**Stem Damage:** caused by windfall, scarring, fire, machine, and animal damage, as well as heart rot diseases.

**Thick Sloughing Bark or Sloughing Sapwood:** usually found on dead trees. Loose bark on Douglas fir or loose sapwood on wind snapped cedars can dislodge during falling.

**Butt and Stem Cankers:** usually found on deciduous trees but can occur on Douglas fir and pine. The infected areas weaken the stem.

**Fungal Fruiting Bodies or Conks:** found on stems may indicate massive interior rot 1 – 2 yards above and below conk. Excessive resinosis (resin flow) also indicates heart or root diseases.

**Heavy Tree Lean:** may be caused by damaged roots or lifting root mats, shallow or wet soils. In some cases, the tree may have corrected itself which can be determined by looking for corrected top growth.

**Root Condition:** look for any ground cracks around the base of the tree, signs of decay or fungal conks on the roots.

**Cat Face:** look for enough solid wood to construct an effective undercut and back cut.
