# National Interagency Coordination Center <br> Incident Management Situation Report <br> Sunday, July 22, 2018 - 0530 MT <br> National Preparedness Level 4 

## National Fire Activity

Initial Attack Activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command teams committed:
Light (133) new fires
11
5
48
NIMOs committed:
0
Type 1 IMTs committed:
0
Type 2 IMTs committed:

Nationally, there are 25 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.

The U.S. has mobilized 12 federal wildland firefighters to support fire suppression efforts in Ontario, Canada.

## Northwest Area (PL 4)

New fires:
New large incidents:
Uncontained large fires:
Type 1 IMTs committed:
3
Type 2 IMTs committed:

Garner Complex (6 fires), Grant Pass Unit, ODF. ODF IMT 1 (Cline). Four miles east of Cave Junction, OR. Timber and medium logging slash. Active fire behavior with uphill runs, running and group torching. Numerous structures threatened. Evacuations, road and area closures in effect.

Substation, Wasco County. Transfer of command from IMT 1 (Schulte) back to the local unit will occur tomorrow. Started on private land five miles south of The Dalles, OR. Brush and tall grass. Minimal fire behavior. Numerous structures threatened. Evacuations and area closures in effect. Reduction in acreage due to more accurate mapping.

Natchez, Rogue River-Siskiyou NF. Transfer of command from IMT 2 (Lawson) to IMT 1 (Livingston) will occur today. IMT is also managing the Klondike incident. Fifteen miles southeast of Cave Junction, OR. Timber, chaparral and hardwood litter. Active fire behavior with spotting, uphill runs and backing. Structures threatened. Road and area closures in effect.

KIondike, Rogue River-Siskiyou NF. Nine miles northwest of Selma, OR. Hardwood litter and brush. Active fire behavior with uphill runs, flanking and backing. Structures threatened.

South Umpqua Complex (4 fires), Umpqua NF. IMT 2 (Sheldon). Thirty miles southeast of Myrtle Creek, OR. Timber. Active fire behavior with uphill runs, short crown runs and spotting. Structures threatened. Road and trail closures in effect.

Hendrix, Rogue River-Siskiyou NF. IMT 2 (Harrod). Three miles southwest of Ashland, OR. Timber and medium logging slash. Active fire behavior with single-tree torching. Structures threatened.

Timber Crater 6, Crater Lake National Park, NPS. IMT 2 (Goff). Twenty miles southwest Chemult, OR. Timber. Active fire behavior with group torching and short-range spotting. Area closures in effect.

Sugar Pine, Rogue River-Siskiyou NF. IMT 2 (Gales). IMT is also managing the Union and Round Top incidents. Twelve miles northwest of Prospect, OR. Timber. Moderate fire behavior with backing and flanking.

Union, Rogue River-Siskiyou NF. Ten miles northeast of Prospect OR. Timber. Moderate fire behavior with creeping, flanking and backing.

* Round Top, Rogue River-Siskiyou NF. Eight miles northwest of Prospect, OR. Timber. Moderate fire behavior with torching, flanking and backing.

Boylston, Southeast Region, Washington DNR. IMT 2 (Knerr). Thirteen miles east of Ellensburg, WA. Brush and tall grass. Minimal fire behavior with creeping. Road and area closures in effect. Sage-grouse habitat threatened.

Cemetery, Prineville District, BLM. Transfer of command from IMT 2 (Johnson) back to the local unit will occur today. Thirty-two miles southeast of Prineville, OR. Timber, brush and tall grass. Minimal fire behavior. Sagegrouse habitat threatened.

Buckshot, Spokane District, BLM. Started on private land two miles south of Mattawa, WA. Brush and tall grass. Minimal fire behavior. Numerous structures threatened. Road and area closures in effect. Reduction in acreage due to more accurate mapping.

* Locust Grove, Washington State Fire. Five miles southwest of Kennewick, WA. Short grass. Moderate fire behavior with uphill runs, wind-driven runs and backing. Residences threatened. Road closures in effect.
* Wagner Complex, Medford Unit, ODF. Three miles south of Talent, OR. Timber and brush. Moderate fire behavior. Structures threatened.

*1 Hectare = 2.47 Acres

Predictive Services Discussion: The Four Corners high pressure area will strengthen over the Southwest as it center remains far enough east to allow for monsoonal moisture to move into the Great Basin and Central Rockies to recharge the ongoing daily convection. Expect scattered storms to develop as far north as southern Oregon and south central Montana. Storms across Colorado will be quite wet...possibly wet enough to raise flash flooding concerns. Breezy conditions will continue across the northern Great Plains as a weak cold front moves east across the Dakotas. Wet conditions are possible across the East as a low pressure area intensifies over the Ohio River Valley. Central Texas will remain hot and dry as drought conditions continue to worsen. Other States along the Gulf coast can expect to see scattered afternoon storms as a stationary front lingers along the coast.
http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## Cramer Fire - Idaho

"May the lessons of the Cramer Fire not be lost on an Idaho ridge"
Incident Summary: 2003 - Central Idaho including the Salmon-Challis Nat'I Forest had been in a period of drought for the last 4 years. Spring and summer rainfall had lagged. 1630 July $20^{\text {th }}$ a fire is reported in the area of Cramer Creek. Jumpers are dispatched and size up the Cramer Fire at 3 acres with high spread potential. High winds keep them from engaging the fire. Firefighters are flown in to a helispot (H1) on a ridge between Cramer and Cache Bar drainages, and due to fire behavior, do not engage the fire. The fire burns actively until 0230 . By morning the fire is over 35 acres.

In addition to other air and ground resources, the Indianola helicopter H193 and Helitack crew report to the fire at 1515 on the $21^{\text {st }}$. By 1952 the fire is 200 acres. At 2000 fire intensity is reported to be low yet due to a thermal belt, the fire burns actively until 0300 . Around 0930 the morning of the $22^{\text {nd }}, \mathrm{H} 193$ rappels two Helitack into a new helispot $(\mathrm{H} 2)$ up the ridge from H 1 . Air attack reports fire perimeter is now over the ridge and in the Cache Bar drainage. The fire is now on both sides of the ridge that the helispots are on. Fire is active below H 1 . The Helitack are falling large trees on H 2 to clear room for medium helicopters that had been ordered for a crew shuttle. H 193 transitions to bucket work on H 1 at 1127 and minutes later the firefighters on H 1 pull back and retreat down the trail toward the river. 20 minutes later H 1 is burned over. Fire activity is reported as "intense".

By 1430 the fire in the Cache Bar drainage is an active fire front. At 1447 plans were made to remove the Helitack from H2. At 1500 the fire on both sides of the ridge begins to spread rapidly...Both helicopters assigned to the fire are at the helibase 15 minutes away for refueling and maintenance when the Helitack call for an immediate pick up. At 1505 they call again for immediate pickup. At 1509 they call for immediate pickup and report that they are fine just taking a lot of smoke. At 1513 the Helitack report fire and smoke below them and request immediate pickup. At 1519 Helitack contact helibase regarding status of helicopter. Arriving at the fire, the helicopter is unable to land due to smoke. Both rappellers leave H 2 at 1520. At 1524 the Cache Bar drainage is fully involved in fire. The rappellers make final call for immediate pickup... Both firefighters die soon after.

History - The Salmon River Breaks area of the SalmonChallis Nat'I Forest has a long history of entrapping firefighters; 161 to date. Steep slopes predispose areas to rollout and rapid, uphill fire growth commonly lending to extreme fire behavior and difficult suppression.

- How can information about an area's fire history help your situational awareness?

Size up - Crews are informed at the July 22 morning briefing that conditions will be getting progressively warmer and drier than previous days. Temperatures surpass $100^{\circ} \mathrm{F}$ and set record highs. RH's are 10-15\%. Fuels in the Cache Bar drainage are short grass on the south aspects and nearly continuous fields of ceanothus on the north. Live fuel moistures are critically low and the Burn Index (BI) and Energy Release Component (ERC) indicate dangerous conditions.

- Based on the predicted weather and the fire information above, what are your concerns?
- How could you and your crew safely engage a fire in a similar situation?

L - The investigation report states that there were no effective lookouts for the rappellers at H 2 .

- It is not uncommon to assign small squads to isolated tasks such as cutting helispots. The rappellers on H 2 were clearing large trees to make a larger helispot. How would you and your crew maintain situational awareness of the fire and the felling operation at the same time?

C - The rappellers were made aware of the low intensity fire in the Cache Bar drainage as soon as they were dropped off but the development of an active fire front in the Cache Bar drainage was observed by the lead plane and air attack 50 minutes before the fire reached H 2 . It was never communicated to them.

- What will you and your crew do during any fire assignment to get accurate information about current fire behavior?

E and S - There were no effective safety zones for the rappellers at H 2 and once H 1 below them burned over, the only way out was a helicopter.

- Helicopters have become a common resource on fires transporting us to and from remote fireline, delivering our food, water, supplies, and medevac. But what would you do if the helicopter couldn't come? Discuss why depending on helicopters as an escape route is a bad idea?

Incident Complexities - On any incident, we may or may not be aware of problems with incident management effectiveness, adequacy of resources, or other big-picture details.

- Discuss how you and your crew will maintain safety without knowing these things.
