

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, July 24, 2018 – 0530 MT
National Preparedness Level 4**

National Fire Activity

| | |
|-------------------------------|-------------------|
| Initial Attack Activity: | Light (144 fires) |
| New large incidents: | 12 |
| Large fires contained: | 11 |
| Uncontained large fires:** | 56 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 3 |
| Type 2 IMTs committed: | 11 |

Nationally, there are 25 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

The U.S. has mobilized 12 federal wildland firefighters to support fire suppression efforts in Ontario, Canada.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Spokane, WA in support of wildland fire operations in the West.

| Active Incident Resource Summary | | | | | | |
|---|------------------|-------------------------|--------------|----------------|--------------------|------------------------|
| GACC | Incidents | Cumulative Acres | Crews | Engines | Helicopters | Total Personnel |

Northwest Area (PL 4)

| | |
|--------------------------|----|
| New fires: | 8 |
| New large incidents: | 0 |
| Uncontained large fires: | 22 |
| Type 1 IMTs committed: | 2 |
| Type 2 IMTs committed: | 4 |

Garner Complex (6 fires), Grant Pass Unit, ODF. ODF IMT 1 (Cline). Four miles east of Cave Junction, OR. Timber and medium logging slash. Active fire behavior with uphill runs, group torching and spotting. Numerous structures threatened. Evacuations, road and area closures in effect.

Klondike, Rogue River-Siskiyou NF. IMT 1 (Livingston). IMT is also managing the Natchez incident. Nine miles northwest of Selma, OR. Hardwood litter and brush. Active fire behavior with backing, flanking and single-tree torching. Residences threatened. Evacuations, road and area closures in effect.

Natchez, Rogue River-Siskiyou NF. Fifteen miles southeast of Cave Junction, OR. Timber, chaparral and hardwood litter. Active fire behavior with backing, flanking and single-tree torching. Structures threatened. Road, area and trail closures in effect.

South Umpqua Complex (4 fires), Umpqua NF. IMT 2 (Sheldon). Thirty miles southeast of Myrtle Creek, OR. Timber. Active fire behavior with short-range spotting, uphill runs and crowning. Residences threatened. Road and trail closures in effect.

Timber Crater 6, Crater Lake National Park, NPS. IMT 2 (Goff). Twenty miles southwest Chemult, OR. Timber. Active fire behavior with backing, group torching and short-range spotting. Area closures in effect.

Sugar Pine, Rogue River-Siskiyou NF. IMT 2 (Gales). IMT is also managing the Goodview, Round Top and Union incidents. Twelve miles northwest of Prospect, OR. Timber. Moderate fire behavior with flanking, short-range spotting and torching.

Goodview, Rogue River-Siskiyou NF. Ten miles northwest of Prospect OR. Timber. Active fire behavior with spotting, torching and backing.

Round Top, Rogue River-Siskiyou NF. Eight miles northwest of Prospect, OR. Timber. Moderate fire behavior with backing, smoldering and flanking.

Union, Rogue River-Siskiyou NF. Ten miles northeast of Prospect OR. Timber. Moderate fire behavior with creeping, smoldering and backing.

Hendrix, Rogue River-Siskiyou NF. IMT 2 (Harrod). Nine miles southwest of Ashland, OR. Timber and medium logging slash. Active fire behavior with single-tree torching. Residences threatened.

Substation, Wasco County. Started on private land five miles south of The Dalles, OR. Brush and tall grass. Minimal fire behavior. Numerous structures threatened.

Wagner Complex (1 fire), Medford Unit, ODF. Three miles south of Talent, OR. Timber and brush. Moderate fire behavior with flanking, backing and short-range spotting. Structures threatened.

Cemetery, Prineville District, BLM. Thirty-two miles southeast of Prineville, OR. Timber, brush and tall grass. Minimal fire behavior. Sage-grouse habitat threatened.

Buckshot, Spokane District, BLM. Started on private land two miles south of Mattawa, WA. Brush and tall grass. No new information. Last report unless new information is received.

Predictive Services Discussion: A cold front departing through the northern Great Plains will create scattered strong storms across the Upper Mississippi River Valley as it moves east. Beneath it, the Four Corners High will begin to drift west. A stronger surge of monsoonal moisture will work its way north into the northern Great Basin and Wyoming, potentially reaching into southern Montana. Widely scattered monsoonal convection will redevelop across southern Oregon and Northern California. Given preexisting fuel conditions, new starts are likely. Central and West Texas will finally get a chance at getting some moisture as a disturbance moves south along the front edge of the high pressure ridge. Scattered storms will continue along the Gulf Coast as a low pressure area slowly drifts west toward Mississippi. Wind concerns today will be limited mainly to North Dakota where a dry, breezy northwesterly post-frontal flow will develop.

SAFENETs

Fire Communication Category

SAFENET is a form and process for front line firefighters that provides a way to be heard and get unsafe situations resolved. SAFENET has been in demand by firefighters themselves. It is a method for prompt reporting and timely resolution of safety and health concerns encountered in wildland fire, all hazard operations, or other related work environments. The information on the form assists in the collection of important, safety-related data at the National Interagency Fire Center, to determine long-term trends and problem areas. Here are some facts about SAFENET and how it works.

- Individuals who observe or who are involved in an unsafe situation shall initiate corrective actions if possible, and then report the occurrence using SAFENET. SAFENET reports should identify unsafe situations in wildland fire, all hazard operations, or other related work environments.
- SAFENETs should be submitted to the first line supervisor, whose responsibility it is to resolve the situation as quickly as possible.
- SAFENETs may also be submitted directly to the SAFENET system via: <https://safenet.nifc.gov/sindex.cfm>
- SAFENET was originally intended for wildland fire operations, but can be used to report on activities such as training, and all hazard events.
- Submitters are encouraged, but not required, to put your name on the report. You don't have to identify yourself to fill out a SAFENET, you can do it anonymously. All SAFENETs will be sanitized before posting to the web. See [SAFENET Protocols](#) for sanitizing process.
- There is no punishment or penalty for filing a SAFENET, nor is it mandatory.
- SAFENETs related to incidents that have on-going serious accident investigations will not be posted until formal investigation process is completed. These SAFENETs will be sent directly to the serious accident investigation team.
- SAFENETs that do not meet posting criteria (see [SAFENET Protocols](#)) will not be posted to the website.

SAFENET is not the only way to correct a safety-related concern; it does not replace accident reporting or any other official agency reporting method. It's simply an easy, quick way to report a safety concern. It's also a way for front line firefighters to be involved in the daily job of being safe and keeping others safe, by documenting and helping to resolve safety issues.

The NWCG encourages comments and suggestions for improvement of the SAFENET program. Please share your ideas by emailing the SAFENET_Administrator@blm.gov.
