## Predictive Services Discussion:

A stationary front stalled along the Continental Divide will be reinforced by a disturbance moving southeast from British Columbia. With ample monsoonal moisture pooled along the western edge of the front, expect scattered wet and dry storms across the western half of Montana, northern Idaho, and Wyoming. Isolated dry storms will be possible across the Okanogan and the North Cascades in Washington State. Isolated dry storms will also be possible around the periphery of Nevada. The Four Corner's high pressure ridge will remain amplified along the West Coast and will lead to another day of near record setting heat that will promote another very active burning day. Smoke trapped in the valleys near Redding and near the fires across southwestern Oregon will impact air operations during the first half of the day until the inversion breaks and the smoke begins to lift. The same could hold true for the Ferguson Fire in California. Overnight humidity recoveries will be poor across California, Oregon, and Washington. Looking elsewhere, expect more scattered wet monsoonal convection in the Four Corners.

## Lookouts (LCES)

Operational Engagement Category

Lookouts are often better situated to notice the cumulative changes of fire behavior.
Fire Order \#5 says "Post lookouts when there is possible danger." Should you utilize lookouts at all times?

- Lookouts should be posted at all times.

What are you looking for when you are selecting a lookout location?

- Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
- Never rely exclusively on aircraft as your lookout.

What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?

- Experienced firefighter.
- Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
- Knowledge of crew locations, escape and safety locations and trigger points.
- Good communicator - keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
- Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.
- Knowledge of weather patterns, and signs of incoming weather changes.

What is the necessary equipment for a lookout?

- PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, water and watch.

[^0]:    * MM73 Hwy55, Southwest Area, Idaho Department of Lands. Twenty-five miles north of Boise, ID. Timber, brush and tall grass. Active fire behavior with running and flanking. Structures threatened.

[^1]:    * Cranston, San Bernardino NF. IMT 1 (McGowan) mobilizing. Timber, brush, and chaparral. Extreme fire behavior with crowning, torching and running. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

[^2]:    * Brushy Creek, Southeast Area, Oklahoma DOF. Three miles north of Cloudy, OK. Timber. Extreme fire behavior with running, torching and spotting.
