## Northwest Area (PL 5)

| New fires: | 20 |
| :--- | :---: |
| New large incidents: | 3 |
| Uncontained large fires: | 27 |
| Type 1 IMTs committed: | 6 |
| Type 2 IMTs committed: | 5 |

Taylor Creek, Medford District, BLM. IMT 1 (Schulte). Ten miles west of Grants Pass, OR. Timber and brush. Moderate fire behavior with uphill runs, group torching and spotting. Numerous structures and communication infrastructure threatened. Road, area and trail closures in effect.

Sugar Pine, Rogue River-Siskiyou NF. IMT 2 (Gales). IMT is also managing the Goodview, Round Top and Union incidents. Twelve miles northwest of Prospect, OR. Timber. Active fire behavior with running, torching and spotting. Numerous structures threatened. Road, area and trail closures in effect.
Goodview, Rogue River-Siskiyou NF. Ten miles northwest of Prospect, OR. Timber. Minimal fire behavior. Road, area and trail closures in effect.

Round Top, Rogue River-Siskiyou NF. Eight miles northeast of Prospect, OR. Timber. Minimal fire behavior.
Union, Rogue River-Siskiyou NF. Ten miles northeast of Prospect, OR. Timber. Minimal fire behavior.
South Umpqua Complex (3 fires), Umpqua NF. Transfer of command from IMT 2 (Sheldon) to IMT1 (Turman) on 8/5. Thirty miles southeast of Myrtle Creek, OR. Timber. Active fire behavior with torching, spotting and winddriven runs. Numerous residences threatened. Evacuations, road and trail closures in effect.

Klondike, Rogue River-Siskiyou NF. IMT 1 (Livingston). IMT 1 (Goicoechea) mobilizing. IMT is also managing the Natchez incident. Nine miles northwest of Selma, OR. Timber and brush. Active fire behavior with torching, spotting and uphill runs. Residences threatened. Road, area and trail closures in effect.

Natchez, Rogue River-Siskiyou NF. Fifteen miles southeast of Cave Junction, OR. Timber, chaparral and hardwood litter. Active fire behavior with torching, spotting and uphill runs. Structures threatened. Evacuations, road, area and trail closures in effect.

Garner Complex (3 fires), Grants Pass Unit, ODF. ODF IMT 1 (Hessel). Four miles east of Cave Junction, OR. Timber and medium logging slash. Minimal fire behavior. Numerous structures threatened. Road and area closures in effect.

Timber Crater 6, Crater Lake National Park, NPS. IMT 2 (Goff). IMT is also managing the Timber Crater 10 incident. Twenty miles southwest of Chemult, OR. Timber. Moderate fire behavior with isolated torching, shortrange spotting and smoldering. Area closures in effect.

Timber Crater 10, Crater Lake National Park, NPS. Twenty miles southwest of Chemult, OR. Timber. Moderate fire behavior with isolated torching, short-range spotting and smoldering. Area closures in effect.

Cougar Creek, Okanogan/Wenatchee NF. Transfer of command from IMT 2 (Rabe) to IMT 1 (Young) will occur tomorrow. Eight miles northwest of Manson, WA. Timber and medium logging slash. Active fire behavior with group torching and flanking. Numerous structures threatened. Road and trail closures in effect.

* Miriam, Okanogan/Wenatchee NF. IMT 2 (Knerr) mobilizing. Fifteen miles east of Packwood, WA. Timber and brush. Active fire behavior with backing, flanking and single-tree torching. Structures threatened. Evacuations, road, area and trail closures in effect.
* Crescent Mountain, Okanogan/Wenatchee NF. Eighteen miles west of Winthrop, WA. Timber. Extreme fire behavior with wind-driven runs, short crown runs and uphill runs. Numerous residences threatened. Last narrative report unless significant activity occurs.
* Milepost 90, Washington State. One mile southwest of Wheeler, WA. Brush and tall grass. Moderate fire behavior with wind-driven runs and backing. Structures threatened. Road and area closures in effect.

Sheep Creek, Northeast Region, Washington DNR. Four miles northwest of Northport, WA. Timber. Moderate fire behavior. Structures and communication infrastructure threatened. Road and area closures in effect.

Substation, Wasco County. Started on private land five miles south of The Dalles, OR. Brush and grass. Minimal fire behavior.

Long Hollow 0806 RN, Prineville District, BLM. Started on private land five miles south of Dufur, OR. Brush and grass. Minimal fire behavior. Road, area and trail closures in effect.

Cemetery, Prineville District, BLM. Thirty-two miles southeast of Prineville, OR. Timber, brush and tall grass. Minimal fire behavior. Sage-grouse habitat threatened.

Hendrix, Rogue River-Siskiyou NF. Nine miles southwest of Ashland, OR. Timber and medium logging slash. Minimal fire behavior. Residences threatened. Road, area and trail closures in effect.

Pole Creek, Vale District, BLM. Started on state land 20 miles south of Jordan Valley, OR. Timber and short grass. Minimal fire behavior. Sage-grouse habitat threatened.

Lake Wallula, Mid-Columbia National Wildlife Refuge, FWS. Started on BLM land five miles east of Umatilla, OR. Brush and short grass. No new information.

116 Wilson Prairie, John Day Unit, ODF. Thirty miles south of Heppner, OR. Timber and brush. No new information.

Warner Gulch, Southeast Region, Washington DNR. Eleven miles southwest of Asotin, WA. Brush and short grass. No new information.

Predictive Services Discussion: Breezy and dry conditions are expected across the Pacific Northwest, Northern Rockies, Northern California, and the northern Great Basin as a tight southwesterly flow develops. Temperatures in these areas will be cooler than previous weeks, but the airmass will be quite dry. There is good potential that ongoing fires in these areas will be pushed by the winds today. Elsewhere, hot and dry conditions are expected to continue inland across Central and Southern California. Scattered mainly wet convection is expected across the Four Corners Region as the monsoon becomes a bit more active. Texas will remain hot and dry under the effects of the Bermuda High to the east which will be centered just off the East Coast. The presence of this high will allow for a cold front to remain stalled along the Atlantic Coast. As a result, scattered showers and storms are expected from Main south to northern Florida. In Alaska, a moistening southwesterly flow from a low pressure area centered near Nome will spread showers into the western Interior. Temperatures across the eastern Interior will cool as the ridge of high pressure flattens.

## Hazard Tree Identification <br> Felling Safety Category

## Some Common tree deficiencies which contribute to potential felling hazards:

Weak Limbs: limbs of all sizes and species with decay evident cracking, loose hung-up or fire damaged limbs. Avoid working under overhead hazards.

Weak Tops: split/schoolmarm tops that could have weakened unions, fire weakened tops, rotten or dead tops.

Witches Broom: caused by mistletoe infection, limbs can grow very large and heavy (200+
 lbs). Can contribute to uneven weight distribution.

Split Trunk: cracked trunk from frost, lightning or wind. Visible evidence of advanced decay indicates serious weakness where the tree could fail. May increase wood fiber tension contributing to barber chair potential.

Stem Damage: caused by windfall, scarring, fire, machine, and animal damage, as well as heart rot diseases.
Cat Face: look for enough solid wood to construct an effective undercut and back cut. Complexity increases when desired felling direction is different than that of the cat face.

Thick Sloughing Bark: usually found on dead trees. Loose bark particularly on Douglas firs can injure sawyers.
Butt and Stem Cankers: usually found on deciduous trees but can occur on Douglas fir and pine. The infected areas weaken the stem.

Fungal Fruiting Bodies or Conks: found on stems may indicate massive interior rot. Excessive resinosis (resin flow) also indicates heart or root diseases.

Heavy Tree Lean: look for any ground cracks around the base of the tree. May be caused by damaged roots or lifting root mats, shallow or wet soils. In some cases, the tree may have corrected itself which can be determined by looking for corrected top growth.

Root Condition: Weakened roots may reduce felling control. Signs of decay or fungal conks on the roots or fire weakened roots.

Species Consideration: consult local experts for species deficiencies particular to local areas. A good habit is to observe overall tree stand health wherever you're working.

Felling a hazard tree requires accurate risk assessment and complexity analysis and demands the sawyer's full situational awareness. Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Discuss indicators of tree defects specific to your local area.
