## Northwest Area (PL 5)

| New fires: | 6 |
| :--- | :---: |
| New large incidents: | 2 |
| Uncontained large fires: | 23 |
| Type 1 IMTs committed: | 8 |
| Type 2 IMTs committed: | 3 |

Cougar Creek, Okanogan/Wenatchee NF. IMT 1 (Young). Twelve miles northwest of Ardenvoir, WA. Timber, medium logging slash and closed timber litter. Active fire behavior with uphill runs, isolated torching and backing. Numerous structures and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Crescent Mountain, Okanogan/Wenatchee NF. IMT 1 (Dueitt). Eighteen miles west of Winthrop, WA. Timber. Active fire behavior with uphill runs, group torching, and short-range spotting. Numerous residences threatened. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

Angel Springs, Northeast Region, Washington DNR. IMT 2 (Goldman). Eight miles northeast of Davenport, WA. Timber, brush and tall grass. Moderate fire behavior with backing, creeping and smoldering. Numerous residences threatened. Evacuations have been lifted.

Miles, Umpqua NF. Unified Command between IMT 1 (Turman) and ODF IMT 1 (Hessel). IMT is also managing the Snow Shoe, Columbus and Round Top incidents. Previously reported as part of the South Umpqua Complex. Includes previously reported Sugar Pine incident. Five miles northeast of Trail, OR. Timber. Active fire behavior with running, spotting and torching. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Snow Shoe, Umpqua NF. Previously reported as part of the South Umpqua Complex. Six miles northwest of Trail, OR. Timber. Minimal fire behavior.

Columbus, Umpqua NF. Previously reported as part of the South Umpqua Complex. Fifteen miles east of Tiller, OR. Timber. Active fire behavior with single-tree torching, short-range spotting and short crown runs. Road and trail closures in effect.

Round Top, Rogue River-Siskiyou NF. Eight miles northeast of Prospect, OR. Timber. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Taylor Creek, Medford District, BLM. IMT 1 (Schulte). IMT is also managing the Klondike incident. Ten miles west of Grants Pass, OR. Timber and brush. Moderate fire behavior with uphill runs, backing and isolated torching. Numerous structures and communication infrastructure threatened. Road, area and trail closures in effect.

Klondike, Rogue River-Siskiyou NF. Transfer of command from IMT 1 (Goicoechea) to IMT 1 (Schulte) occurred yesterday. Nine miles northwest of Selma, OR. Timber and chaparral. Moderate fire behavior with uphill runs, backing and isolated torching. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Miriam, Okanogan/Wenatchee NF. IMT 2 (Knerr). Fifteen miles east of Packwood, WA. Timber and brush. Active fire behavior with torching, uphill runs and short-range spotting. Numerous structures threatened. Evacuations, road, area and trail closures in effect.
Natchez, Rogue River-Siskiyou NF. IMT 1 (Goicoechea). Fifteen miles southeast of Cave Junction, OR. Timber and chaparral. Active fire behavior with torching, spotting and uphill runs. Structures threatened. Evacuations, road, area and trail closures in effect.

Garner Complex (3 fires), Grants Pass Unit, ODF. IMT 1 (Dolan). Four miles east of Cave Junction, OR. Timber and medium logging slash. Minimal fire behavior. Numerous structures threatened.

South Valley Road, the Dalles Unit, ODF. ODF IMT 1 (Cline). Seven miles southwest of Dufur, OR. Timber and grass. Minimal fire behavior. Numerous residences threatened.

* Maple, Olympic NF. IMT 2 (Lawson). Ten miles north of Hoordsport, WA. Timber. Active fire behavior with uphill runs, group torching and single-tree torching. Structures and communication infrastructure threatened. Road, area and trail closures in effect.

Hendrix, Rogue River-Siskiyou NF. Nine miles southwest of Ashland, OR. Timber and medium logging slash. Minimal fire behavior. Residences threatened. Road, area and trail closures in effect.

* Twin Springs, Vale District, BLM. Twenty-five miles south of Vale, OR. Brush and grass. Minimal fire behavior. Sage-grouse habitat threatened.

Timber Crater 10, Crater Lake National Park, NPS. Twenty miles southwest of Chemult, OR. Timber. Minimal fire behavior. Area closures in effect.

Timber Crater 6, Crater Lake National Park, NPS. Twenty miles southwest of Chemult, OR. Timber. Minimal fire behavior. Area closures in effect.

Long Hollow 0806 RN, Prineville District, BLM. Started on private land five miles south of Dufur, OR. Brush and grass. Minimal fire behavior.

Silver Lake, Northeast Region, Washington DNR. Five miles west of Cheney, WA. Timber, light logging slash and short grass. No new information.

Sheep Creek, Northeast Region, Washington DNR. Four miles northwest of Northport, WA. Timber. No new information.

Union, Rogue River-Siskiyou NF. Ten miles northeast of Prospect, OR. Timber. No new information. Last report unless new information is received.

## Northern Rockies Area (PL 3)

New fires: 14
New large incidents:
0
Uncontained large fires: 6
Type 2 IMTs committed: 5

Tenmile, Kootenai NF. IMT 2 (Connell). Nineteen miles south of Eureka, MT. Timber. Moderate fire behavior with isolated torching, creeping and smoldering. Structures, communication and energy infrastructure threatened. Road, area and trail closures in effect.

Rattlesnake Creek, Nez Perce-Clearwater NF. Transfer of command from IMT 2 (Almas) to IMT 2 (Sinclair) will occur tomorrow. Five miles southwest of Riggins, ID. Timber and short grass. Active fire behavior with isolated torching, short-range spotting and flanking. Numerous structures threatened. Road, area and trail closures in effect.

Copper Mountain, Idaho Panhandle NF. Four miles east of Eastport, ID. Timber. Moderate fire behavior with torching, flanking and creeping.

Garden Creek, Flathead Agency, BIA. Two miles north of Ronan, MT. Timber and tall grass. Active fire behavior with group torching, isolated torching and spotting.

Davis, Kootenai NF. IMT 2 (Fry). IMT is also managing the Porcupine incident. Ten miles northwest of Yaak, MT. Timber. Moderate fire behavior with group torching, short-range spotting, backing. Structures threatened. Road, area and trail closures in effect.

Porcupine, Kootenai NF. Fifteen miles west of Eureka, MT. Timber. Minimal fire behavior.
Alpine, Pend Oreille Area Office, Idaho Department of Lands. Eleven miles northwest of Sandpoint, ID. Timber and brush. Active fire behavior with isolated torching and spotting. Road closures in effect.

Cougar, Idaho Panhandle NF. IMT 2 (Sampson). Five miles east of East Hope, ID. Timber and brush. Active fire behavior with group torching, backing and flanking. Road, area and trail closures in effect.

*1 Hectare = 2.47 Acres

Predictive Services Discussion: The strong ridge of high pressure over the West will continue to strengthen and allow temperatures to rise 10-15 degrees above normal across most areas west of the Continental Divide except New Mexico, Colorado, western Washington and western Oregon where they will be closer to average. Isolated storms will be possible in the Washington Cascades and the Okanogan during the afternoon and evening hours, but they should be wet. A few dry storms may be possible near Yellowstone NP. Elsewhere, scattered wet storms are expected along and east of the Continental Divide from Wyoming south to the Mexican Border. In the East, scattered storms are expected along a stationary front that will be draped across the Deep South into the AR-LA-TX region. The Great Lakes Region and the Northeast should experience overall normal and dry conditions.

# Wildland/Urban Interface Watchouts 

Operational Engagement Category

The primary consideration is to first assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structures. The first step in conducting a safe operation is to assess whether the firefighting operations can be conducted safely.
Consider the "Wildland/Urban Interface Watchouts" in completing a risk analysis for
the urban interface area to be protected. Remember there are three categories of
structures:

- Those that are not threatened.
- Those that are threatened.
- Those that have already been lost or too dangerous to protect.

## Wildland/Urban Interface Watchouts:

- Poor access and narrow, one-way roads. A rapidly spreading fire could trap apparatus and personnel before they can turn around or move away from the flames and smoke.
- Observe bridge limits. Exceeding bridge limits could lead to bridge failure with a resultant blocking of ingress/egress routes that could result in the loss of an escape route or loss of equipment.
- Inadequate water supply. Without a reserve supply of water, the fire can overtake an area before the fuels can be cleared away.
- Natural fuels are located 30 feet or closer to structures on level ground. Remember structures on slopes require greater clearance. Structures are located on canyon slopes or "chimneys" on slopes of $30 \%$ or more with continuous, flashy fuels. The resulting rate of spread of any fire in this terrain can quickly extend beyond control.

Extreme fire behavior: Situations involving crowning, large flame heights and erratic fire behavior can extend in an unpredictable manner beyond the control of any number of personnel. Strong winds of $25+$ MPH: Winds increase the chance of spotting over the heads of firefighters and trapping them between both fire areas. Winds also cause greater preheating of fuels in the path of a fire front.

- The need to evacuate the public, livestock, pets, and/or animals. This critical activity can pull personnel from the firefighting activity and can distract attention from fire behavior at a time when the greatest alertness is needed.
- Propane and above ground fuel tanks that are next to wooden structures or close to vegetation.
- Power lines and poles: What is their location in relation to the structures that are being protected? Watch for both overhead and downed power lines.
- Local citizens are attempting suppression activities. Lack of knowledge in fire suppression may lead to unsafe tactics.
- Airtanker retardant drops and helicopter bucket operations: Establish communications and keep fire personnel out of the drop zone.
