Predictive Services Discussion: Critical fire weather conditions will move across the northwestern U.S. as a strong trough breaks down the upper ridge that was responsible for the record heat over the West for the past week. Winds of 20-30 mph, with gusts to 40-50 mph, are possible across Oregon, Washington, Idaho, and Montana. Breezy to windy conditions are possible in adjacent areas. Isolated thunderstorms will also form over northern Washington to north-central Montana. Temperatures in the Northwest will drop a bit from the record temperatures of the previous days, but hot weather will continue at least another day across most of the West. Scattered showers and thunderstorms will form again over the southern Rockies to western Arizona, with isolated thunderstorms in southern California and the southern Great Basin. East of the Rockies, scattered showers and thunderstorms will continue in West and north Texas, along the Gulf Coast and north to the MidAtlantic region. Temperatures will be seasonally warm, with mild weather in the Northeast and very hot conditions in the northern Plains.

Leadership Category

An important aspect of safety is individual responsibility for one's own health \& safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility be taught as the basis for a viable safety program. Some of those individual responsibilities are:

Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training are the foundation of "My Safety."

Utilization of personal protective equipment. Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified that can be mitigated by wearing a particular PPE component it should be utilized. Fireline supervisors have more important duties to focus on other than performing glove patrol.

Following safe work practices. Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, ask your supervisor or experienced coworker.

Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the Red Book, IRPG, and your local operating guidelines.

Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place yourself or others at risk.

Maintain situational awareness at all times. Awareness is a vital component of "My Safety." Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

## Summary:

Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.

## Discussions Points:

1. Talk about ways you can improve on your safety.
2. Have your supervisor talk about their expectations for individual safety.
