Predictive Services Discussion: The high pressure ridge over the West will amplify north from Mexico to southern Montana where it will encounter an unusually strong back door cold front that will be producing a strong northeasterly pressure gradient over the western half of Montana, northern Idaho, and northern Washington. The pressure gradient will create pockets of critical fire weather conditions, especially across northern Washington where afternoon humidities will be quite lower. Across western Washington and Oregon, a weak low pressure area in the middle levels of the atmosphere will move in-shore and inland. This will trigger isolated convection along and east of the Cascade Crest. Some storms will be dry. The greatest concentration of storms (widely scattered) will be over western Montana, where they will be overall wet. Across the Great Plains, a strong area of low pressure will bring cooler temperatures to the region. In the East, scattered showers will be possible across Virginia and North Carolina. The remainder of the East should be dry.

# Taking A Nap Near The Fireline 

Operational Engagement Category

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following considerations:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards? (Falling snags or rolling materials, etc.) Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review what these guidelines are.

Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fire for uninterrupted rest.

- To reduce risks:
- Keep lookouts posted; rotate lookouts.
- Communicate crew conditions and status to supervisor or chain-of-command contact.
- Have firefighters discuss ways that they find to rest on the fireline and suggestions for methods to alternate shifts for more effective firefighting.
