## National Fire Activity

Initial Attack Activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
Light (97 fires)
3
2
35

Nationally, there are 62 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Two hundred twenty-six soldiers from the $14^{\text {th }}$ Brigade Engineer Battalion based out of Joint Base LewisMcChord, Washington are deployed in support of the Mendocino Complex.

One hundred thirty-five fireline management personnel from Australia and New Zealand are assigned to support large fires in the California and Northwest Areas.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Spokane, WA in support of wildland fire operations in the West.

## Northwest Area (PL 4)

| New fires: | 5 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 10 |
| Type 1 IMTs committed: | 2 |
| Type 2 IMTs committed: | 6 |

Crescent Mountain, Okanogan/Wenatchee NF. IMT 1 (Turman). IMT is also managing the McLeod and Holman incidents. Eighteen miles west of Winthrop, WA. Timber. Active fire behavior with creeping, backing and flanking. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

McLeod, Okanogan/Wenatchee NF. Eight miles north of Mazama, WA. Timber. Active fire behavior with single tree torching, backing and flanking. Road, area and trail closures in effect.

Holman, Okanogan/Wenatchee NF. Nineteen miles northwest of Mazama, WA. Timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, area and trail closures in effect.

Klondike, Rogue River-Siskiyou NF. IMT 1 (Dueitt). Nine miles northwest of Selma, OR. Timber and chaparral. Moderate fire behavior with flanking, uphill runs and backing. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Terwilliger, Williamette NF. IMT 2 (Connell). Five miles southeast of Blue River, OR. Timber. Active fire behavior with uphill runs, torching and short-range spotting. Numerous structures and energy infrastructure threatened. Road, area and trail closures in effect.

Natchez, Rogue River-Siskiyou NF. IMT 2 (Gales). IMT 2 (Knerr) mobilizing. Fifteen miles southeast of Cave Junction, OR. Timber and chaparral. Moderate fire behavior with torching, backing and flanking. Numerous structures threatened. Road, area and trail closures in effect.

Cougar Creek, Okanogan/Wenatchee NF. IMT 2 (Lawson). IMT is also managing the Bannock Lakes incident. Twelve miles northwest of Ardenvoir, WA. Timber, medium logging slash and closed timber litter. Active fire behavior with torching, short crown runs and flanking. Numerous structures threatened. Road, area and trail closures in effect.

Bannock Lakes, Okanogan/Wenatchee NF. Fourteen miles southwest of Stehekin, WA. Timber and brush. Minimal fire behavior. Trail closures in effect.

Watson Creek, Fremont-Winema NF. IMT 2 (Sheldon). Thirteen miles west of Paisley, OR. Timber and brush. Moderate fire behavior. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Taylor Creek, Medford District, BLM. IMT 2 (Harrod). IMT is also managing the east side of the Klondike incident. Ten miles west of Grants Pass, OR. Timber and brush. Minimal fire behavior. Numerous structures threatened. Road, area and trail closures in effect.

Horns Mountain, Colville NF. Nineteen miles north of Evans, WA. Timber and heavy logging slash. Minimal fire behavior. Area closures in effect.

Miles, Umpqua NF. Five miles northeast of Trail, OR. Timber. Moderate fire behavior with isolated torching, backing and creeping. Numerous structures and energy infrastructure threatened. Road, area and trail closures in effect.

Columbus, Umpqua NF. Fifteen miles east of Tiller, OR. Timber. Moderate fire behavior with backing, isolated torching and creeping. Road, area and trail closures in effect.

Boyds, Northeast Region, Washington DNR. Three miles west of Kettle Falls, WA. Timber and brush. Minimal fire behavior. Communication infrastructure threatened.

Howe Ridge, Glacier National Park, NPS. IMT 1 (Goicoechea). IMT is also managing the Whale Butte, Boundary, Paola Ridge and Coal Ridge incidents. Ten miles north of West Glacier, MT. Timber. Moderate fire behavior with backing, flanking and creeping. Structures threatened. Evacuations, road, area and trail closures in effect.

Whale Butte, Flathead NF. Forty-five miles north of Kalispell, MT. Timber. Minimal fire behavior. Numerous structures threatened. Area closures in effect.

Boundary, Glacier National Park, NPS. Forty-two miles northeast of Whitefish, MT. Timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Trail and area closures in effect.

Paola Ridge, Flathead NF. Three miles northwest of Essex, MT. Timber and brush. Minimal fire behavior. Numerous structures and railroad infrastructure threatened. Road, area and trail closures in effect.

Coal Ridge, Flathead NF. Twenty-eight miles north of Kalispell, MT. Timber and brush. Minimal fire behavior. Numerous structures threatened. Road, area and trail closures in effect.

Gold Hill, Kootenai NF. IMT 2 (Thompson). IMT is also managing the Davis incident. Thirteen miles north of Libby, MT. Timber. Minimal fire behavior. Structures threatened.

Davis, Kootenai NF. Ten miles northwest of Yaak, MT. Timber. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect.

Sterling Complex, (2 fires). Kootenai NF. Eighteen miles south of Eureka, MT. Timber and brush. Minimal fire behavior. Numerous structures, energy and communication infrastructure threatened. Road, area and trail closures in effect.

Rattlesnake Creek, Nez Perce-Clearwater NF. IMT 1 (Day). Five miles southwest of Riggins, ID. Timber and short grass. Minimal fire behavior. Road, area and trail closures in effect.

Surprise Creek, Idaho Panhandle NF. NIMO (Houseman). IMT is also managing the Cougar incident. Eighteen miles east of Athol, ID. Timber. Minimal fire behavior. Energy infrastructure threatened. Road, area and trail closures in effect.

Cougar, Idaho Panhandle NF. Five miles east of East Hope, ID. Timber and brush. Minimal fire behavior. Communication infrastructure threatened. Road, area and trail closures in effect.

Rattlesnake, Flathead Agency, BIA. Nine miles northeast of Hot Springs, MT. Timber and tall grass. Active fire behavior with torching and creeping. Reduction in acreage due to more accurate mapping.

Goldstone, Beaverhead/Deerlodge NF. Twelve miles south of Jackson, MT. Timber. Minimal fire behavior. Structures threatened. Road, area and trail closures in effect.

Beaver Creek, Beaverhead/Deerlodge NF. Eighteen miles northwest of Wisdom, MT. Timber. Minimal fire behavior.

Shellrock, Central Land Office, Montana DNRC. Previously reported incident. Twenty-five miles north of Helena, MT. Timber and grass. Minimal fire behavior.

Predictive Services Discussion: A quiet, but slightly breezy westerly flow will continue across the northern tier along the Canadian Border from Washington to Maine. Conditions will be dry in these areas except along the Great Lakes, where scattered showers and storms are expected. To the south, a weak disturbance will move east across the Great Basin and will pull monsoonal moisture further north into Wyoming, creating widely scattered storms that should be a mix of dry and wet. South of this area, two flat high pressure ridges will dominate the weather across most of the southern portions of the country. The Bermuda High will extend west across the Deep South as far as Texas, providing continued hot and humid conditions. A weakened Four Corners High will remain positioned just off the Pacific Coast, allowing for some off-shore flow to continue across Southern California.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## Sundance Fire

Incident Summary: The Sundance Fire is remembered for its extreme fire behavior and on September 1, 1967 a crown fire, in heavy timber, pushed this fire 16 miles in a single burning period. Two firefighters perished in the blowup event.

Factors Influencing Fire Behavior: Lightning started several fires in mid-August of 1967 in the Selkirk Mountains of northern Idaho. The area was in moderate drought, with the last wetting rain in June, and fire danger was classified as extreme. Fuels in this mountainous area were mostly comprised of timber, but also included areas of logging slash. One fire that ignited near the west side of the summit of Sundance Mountain spread relatively slowly at the outset, growing to only 35 acres by August 23. On August 29-30, this Sundance Fire made a major downhill run towards Priest Lake, pushed by strong northeast winds. By August 31, the fire was at 4,000 acres. On September 1, a dry cold front with very strong southwest winds moved over the fire area. The fire weather forecast issued at 0800 that morning called for scattered afternoon and evening thunderstorms, temperatures down 5 degrees, humidity up 5\%, and south-southwest winds at 12-18 mph.

Human Factors and Fire Operations: In response to the fire's growth, a US Forest Service fire management team was ordered, and it assumed command of the incident at 1000 on September 1. Much of the focus was on the fire's movement to the west, as there was no imminent threat perceived of the fire spreading to the east and over the Selkirk Divide. Indeed, earlier that morning, a dozer with operator and Sector Boss (similar to TFLD or STEQ now) were deployed on that opposite side of the Divide, several miles northeast of the fire. Around 1100, they were briefed by a supervisor on work objectives and escape routes. The dozer was assigned to open up roads in the McCormick Creek drainage, starting near the Pack River and moving southwest and up canyon, towards the Selkirk Divide. Fault Lake, their designated safety zone, was 4 miles and 3,000 vertical feet further up the canyon, and work was to progress toward the safety zone. Due to limited supplies and equipment, the Sector Boss had neither a vehicle nor a two-way radio. The dozer operator had a knee injury that hampered his mobility.

The Blowup on September 1: Starting at 1300 with the onset of strong southwest winds, the Sundance Fire became very active, making a significant run up the Soldier Creek drainage, which is aligned mostly in a west to east direction, to the Selkirk Divide. Between 1400 and 1600, the fire crossed east over the Selkirk Divide and burned downslope through the southwest-to-northeast aligned McCormick Creek Canyon and then into the Pack River drainage, where the dozer had worked its way to within $1 / 4 \mathrm{mile}$ of Fault Lake. At 1600, the fire overran the dozer operator and Sector Boss, killing both. During this blowup event on September 1, the Sundance Fire experienced winds of 30 to 50 mph from early afternoon into the night. In the 9 hour period from 1400 to 2300 , the fire increased by 50,000 acres and advanced 16 miles to the NE, with long range spotting up to 10 miles.

## Discussion Points:

Prior to the blowup, there were signals of escalating risk. Discuss the following:

- Given the predicted weather, extreme fire danger, and other factors, what are your concerns?
- The dozer operator was partially handicapped due to an injured knee. How would you handle an injury that limits your physical ability or that of a coworker?
- How did the alignment of general winds with major canyons and drainages affect fire behavior?
- The Sundance Fire was not predicted to spread into McCormick Creek. Once the fire advanced to the east side of the Divide, what actions would you take?
- Given similar circumstances, discuss how you and your crew could apply LCES throughout the day.
- In the IRPG, review the "Human Factor Barriers to Situation Awareness" (page x) and discuss this in relation to the Sundance Fire.
