Predictive Services Discussion: The overall troughy pattern will continue over the West as another, slightly stronger system begins to approach from British Columbia. Breezy winds are possible across Oregon and Washington in the afternoon, along with isolated convection. Temperatures across the West will be slightly below average in most places. Monsoonal storms in the Southwest will focus over New Mexico, Colorado, and Texas. Some storms could reach as far north as Oklahoma and Kansas in the evening. Most of the eastern half of the country will be under the influence of a very strong Bermuda High, as it moves west and on shore into the Mid-Atlantic. Temperatures will be near 100 degrees under the hot and humid air mass. Some relief will be possible along the Canadian Border from the Great Lakes east, as a stationary front remains stalled over the area and produces showers and storms.

## Avoiding Fuel Geysering

Felling Safety Category
Follow these instructions when a Stihl saw is running poorly and "vapor lock" is suspected.
*DO NOT remove the cap it won't fix the problem!*
The following restart process should be started immediately. Saws are air cooled and continue to build heat when not running.

1. Check Fuel Level via the Transparent Tank f tank is over $1 / 2$ full DO NOT remove the cap.
2. Close Choke

Pull starter rope until saw fires, or up to 20 times maximum.
3. Once Saw Fires

Place choke lever in starting position.

Pressure
4. Pull Starter Rope Until Saw Runs, or up to $\mathbf{1 0}$ Times Maximum
5. If Saw Does Not Start

Discontinue use. Let saw cool completely. DO NOT remove the cap.
6. Once Saw is Cool, Start this Process Over.
