

**National Interagency Coordination Center
Incident Management Situation Report
Friday, September 14, 2018 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial Attack Activity:	Light (45 fires)
New large incidents:	7
Large fires contained:	2
Uncontained large fires:**	29
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	6
Type 2 IMTs committed:	9

Nationally, there are 61 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

In support of Hurricane Florence, two Type 2 Incident Management Teams (Parrish) and (Goff) are mobilizing to the Center for Domestic Preparedness in Anniston, AL.

Great Basin Area (PL 3)

New fires:	8
New large incidents:	3
Uncontained large fires:	5
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

* **Bald Mountain**, Uintah-Wasatch-Cache NF. IMT 1 (Pechota) mobilizing. Seven miles northeast of Mona, UT. Timber, brush and short grass. Extreme fire behavior with uphill runs, wind-driven runs and long-range spotting. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Pole Creek, Uintah-Wasatch-Cache NF. IMT 1 (Lund) mobilizing. Twelve miles northeast of Nephi, UT. Timber and brush. Extreme fire behavior with wind-driven runs, running and long-range spotting. Structures threatened. Evacuations, road, area and trail closures in effect

* **Indian Butte**, Clark County. Eight miles northwest of Dubois, ID. Timber, brush and short grass. Active fire behavior with running and short-range spotting. Residences and sage-grouse habitat threatened. Road and trail closures in effect.

Rabbit Foot, Salmon-Challis NF. Fourteen miles southwest of Salmon, ID. Timber and short grass. Moderate fire behavior with backing, single tree torching and creeping. Area and trail closures in effect. Last narrative report unless significant activity occurs.

Boot, Humboldt-Toiyabe NF. Transfer of command from IMT 2 (Bird) back to the local unit will occur on 9/16. Nine miles southwest of Walker, CA. Timber and brush. Moderate fire behavior with isolated torching, backing and creeping. Communication and energy infrastructure threatened. Road, area and trail closures in effect.

Stewart Creek, Sawtooth NF. Eighteen miles northwest of Fairfield, ID. Timber and brush. Moderate fire behavior with torching and creeping. Structures threatened. Road, area and trail closures in effect.

Bender Mountain, Vernal Field Office, BLM. Seventeen miles northwest of Dutch John, UT. Timber. Moderate fire behavior with single tree torching, smoldering and creeping. Structures, energy infrastructure and sage-grouse habitat threatened. Road and area closures in effect.

* **Bum Creek**, Payette NF. Ten miles east of Yellow Pine, ID. Timber. Active fire behavior with isolated torching, flanking and creeping. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Catastrophic flooding will continue across the Carolinas as Florence remains stalled along the coast, slowly drifting southward. Debris flows are likely in areas with elevated terrain. Winds will decrease through the day but remain strong. Fallen/snapped trees along with impassible roads (due to flooding, blockages, and/or damage) may hamper the distribution of resources. Elsewhere, moderate to heavy rain will be possible across coastal portions of Texas, as a tropical disturbance moves north from the Gulf. Localized flooding is a possibility. In the West, temperatures will begin to rebound slightly as the upper level trough over the Pacific Northwest begins to weaken. However, breezy and dry conditions are expected to continue across the Great Basin and central Rockies, though it should not be as significant as recent days.

Building Fireline Downhill With Fire Below

Operational Engagement

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and down slope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below? How many resources do you want to engage?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing, where they are getting their information and where and when it might occur.

Have an idea? Have feedback? Share it.
