

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 19, 2018 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial Attack Activity:	Light (81 fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires:**	19
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	13

Nationally, there are 62 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Three Type 2 Incident Management Teams have mobilized in support of Hurricane Florence. IMT 2 (Goff) is staged in Columbia, SC. IMT 2 (Parrish and Rabe) are staged in Atlanta, GA.

Great Basin Area (PL 4)

New fires:	6
New large incidents:	1
Uncontained large fires:	6
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

Bald Mountain, Uinta-Wasatch-Cache NF. IMT 1 (Pechota). Seven miles northeast of Mona, UT. Timber and brush. Active fire behavior with short crown runs, short-range spotting and backing. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Pole Creek, Uinta-Wasatch-Cache NF. IMT 1 (Lund). Twelve miles northeast of Nephi, UT. Timber and brush. Extreme fire behavior with wind-driven runs, group torching and long-range spotting. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Roosevelt, Bridger-Teton NF. IMT 2 (Chadwick). Thirty-two miles south of Jackson, WY. Timber. Extreme fire behavior with running, crowning and group torching. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Marten Creek, Bridger-Teton NF. IMT 2 (Rohrer). Thirteen miles east of Afton, WY. Timber. Extreme fire behavior with short crown runs and single tree torching. Structures threatened.

* **Cobblersrest**, Uinta-Wasatch-Cache NF. Sixteen miles east of Kamas, UT. Timber. Minimal fire behavior.

Slate, Uinta-Wasatch-Cache NF. Six miles east of Kamas, UT. Timber. Moderate fire behavior with backing, creeping and torching.

Indian Butte, Clark County. Eight miles northwest of Dubois, ID. Timber, brush and short grass. Minimal fire behavior. Road and area closures in effect.

Stewart Creek, Sawtooth NF. Eighteen miles northwest of Fairfield, ID. Timber and brush. Minimal fire behavior. Structures and sage-grouse habitat threatened. Road, area and trail closures in effect. Last narrative report unless significant activity occurs.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: A deepening trough in the West will carry moisture from the Southwest along the Front Range to the northern Plains. Showers and thunderstorms will form from Arizona and New Mexico across eastern Colorado and Wyoming. A front pushing through the Plains will bring rain and a few thunderstorms to the northern states from western Montana to the Great Lakes. Snow is likely at higher elevations of western Montana. Scattered showers will also develop along the Washington Cascades. Windy conditions with low humidity will continue across the Great Basin with gusts 30-35 mph possible in northern Utah and southwestern Wyoming. The northern states will be cool, while very warm and humid conditions settle over the Plains to the Southeast.

Fuel Geyser Awareness

Miscellaneous Fireline Hazards

Fuel geysers continue to injure firefighters. Although the 2017 fire season is only at its midpoint, two firefighters have received burn injuries from fuel geysers. There are also reports of additional fuel geysers that did not result in burn injuries. Please continue to report **any** fuel geyser event on the [Fuel Geyser Reporting Form](#), even if it seems insignificant.

A heated fuel tank can build excessive pressure and cause a fuel geyser when a firefighter opens it. It is important to remember that fuel, heat, and pressure can produce the conditions that may lead to a fuel geyser. These three can create a fuel geyser event through a variety of conditions, one may not be like the next. The temperature of an air-cooled engine continues to increase for a short time after a firefighter shuts off the engine or the engine dies. There are no hard rules or a set amount of time to determine when a fuel tank is cool enough to open. Assume all gas-powered equipment and fuel containers are pressurized. Through a working shift in warmer temperatures, the fuel tanks vary in temperature and pressure, but can reach up to temperatures of 115 *F, and up to 17 PSI.

Watch the video at <https://youtu.be/MgWgVDN8e5s> to see how a fuel geyser affected a hotshot crewmember.

To help keep gas-powered equipment running cooler:

- Keep the equipment's chain/blade sharp and maintain it according to the manufacturer's instructions.
- Follow the manufacturer's recommended gasoline and two-stroke oil mix ratio.
- Minimize the equipment's exposure to radiant heat or direct sunlight. This impacts the temperature inside the fuel tank, raising the temperature on average about 5 degrees higher than those left out of direct sunlight.
- Fuel geysers are more likely to occur if you observe the following indicators:
 - The fuel level is half a tank or more.
 - The engine performs as if it is running out of fuel, bogs down, or has a rapid change in RPM.
 - The engine dies and is difficult to restart.
 - The equipment has a quarter-turn fuel cap.
- Use the following procedures to help protect yourself from fuel geysers:
 - Check the fuel tank level by visually inspecting the opaque tank, not by removing the cap.
 - Place hot equipment in the shade, out of the black, and try to increase airflow to promote cooling.
- **Never** open a fuel tank within 20 feet of any heat source.
- **Avoid** using fuel that has been stored in a fuel container for longer than 1 month.
- If you need to open a fuel tank, put the equipment in a cleared area, cover the cap with a cloth, and open the tank slowly.

For more information or if you experience a fuel geyser, go to the National Fuel Geyser Awareness website at http://bit.ly/fuelgeyser_home.
