# National Interagency Coordination Center <br> Incident Management Situation Report <br> Tuesday, September 25, 2018 - 0530 MT <br> National Preparedness Level 2 

National Fire Activity
Initial Attack Activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (45) new fires
1
2
20
0
1
4
8

Nationally, there are 54 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.
***Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Service Discussion: The broad upper level trough will deepen as it begins to move east. A cold front located along its eastern edge will create widespread showers and storms that will stretch from the Great Lakes south to the Gulf of Mexico. Out west, a strong high pressure ridge will be located along the West Coast. Beneath it, a thermal trough will induce off-shore flow across the Pacific Northwest and northern California. This could lead to pockets of critical fire weather conditions. Western convection will be limited mainly to New Mexico and Colorado and should be isolated.

Instructions And Assignments Not Clear

Fire Communications Category

Every firefighter will be giving and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did you use the Incident Response Pocket Guide standards briefing checklist?

Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?

- Did they take notes? What kind of information would you like to see people write down?

Did they repeat information back? What other ways can you identify that your briefing is registering?

- Did you give all the necessary information? How will you ensure that you covered everything necessary?
- Task
- Location
- Communications
- Hazards
- Who, when, etc.
- It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:
- Did you really listen? What do you do to make yourself pay attention to everything being said?
- Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- You must know the location of the assignment and:
- What is to be done?
- Who you are to report to and how often to report.
- When you are expected to complete the assignment.
- Hazards.
- Communication plan frequencies.
- Weather and fire behavior.
- Status of adjoining forces.
