National Interagency Coordination Center Incident Management Situation Report Monday, October 1, 2018 – 0530 MT National Preparedness Level 2

National Fire Activity

Initial Attack Activity:	Light (47) new fires
New large incidents:	g(),
Large fires contained:	1
Uncontained large fires:**	16
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Nationally, there are 48 large fires being managed under a strategy other than full suppression. **Uncontained large fires include only fires being managed under a full suppression strategy. Link to Geographic Area daily reports.

Predictive Service Discussion: The remnants of Hurricane Rosa will begin to spread rainfall into the Great Basin. Widespread wetting rainfall is expected to fall and produce a benefitting effect on the fuels. To the northwest of this system, off the California Coast, an area of low pressure will continue to move south just off shore. This could produce some off shore wind flow activity across northern California, but winds should not be strong enough to be a major concern. A cold front will move into the Pacific Northwest, bringing showers to Washington state. In the East, the Bermuda High will strengthen over the southeast and expand northward into Maryland and Delaware, creating warm and dry conditions across the eastern seaboard.

Extended Attack

Operational Engagement Category

After your initial size-up of the fire and/or transfer of command from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the other forces associated with the fire?
- Can you control the fire with the resources available (either on the incident or soon to be on the incident) under expected conditions?
- Have you developed a plan to attack the fire?
 - Direct or indirect
 - Anchor points
 - Escape routes
 - Head or flank attack
 - Priority areas
- Have you communicated this to all personnel assigned to the incident, including new arrivals?
- Can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
 - If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of what resources have been ordered for the fire?
