National Interagency Coordination Center Incident Management Situation Report Tuesday, October 23, 2018 – 0800 MT National Preparedness Level 1

National Fire Activity

<u> </u>	
Initial Attack Activity:	Light (54) new fires
New large incidents:	1
Large fires contained:	2
Uncontained large fires:**	2
Area Command teams committed:	0
NIMOs committed:	1

Type 1 IMTs committed: 3
Type 2 IMTs committed: 1

In support of Hurricane Michael, IMT 1 (Leneave) has mobilized to Bay County, Florida.

Southern Area (PL 2)

New fires:	30
New large incidents:	0
Uncontained large fires:	0
NIMOs committed:	1
Type 1 IMTs committed:	2

^{**}Uncontained large fires include only fires being managed under a full suppression strategy. **Link** to Geographic Area daily reports.

FNF Hurricane Michael – Roads, National Forests in Florida. IMT 1 (Dueitt). Personnel are assessing and repairing damage to trails, roads, infrastructure and recreation areas managed by the Appalachicola NF. Road, area and trail closures in effect.

Chipola Support, Florida Forest Service. Florida IMT 1 (Mousel). Personnel are coordinating repair and recovery efforts and wildfire response. Road closures in effect.

Hurricane Florence, National Forests in North Carolina. NIMO (Houseman). Personnel are assessing and repairing damage to trails, roads and recreation areas managed by the Croatan NF. Road, area, and trail closures in effect.

^{***} Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Service Discussion: A cold front will begin to move into the Pacific Northwest in the afternoon and should spread showers into the Cascades. Snow levels should mostly be above the Passes. Conditions elsewhere across the West will be dry as high pressure slowly drifts east to be over the Continental Divide. A dry, southerly flow will continue across the Great Plains and should keep temperatures right around normal. Scattered showers and storms will be possible across Colorado, New Mexico, Texas, and Louisiana as a trough over the Southwest begins to move east. In the East, expect overall dry conditions but cooler than average temperatures as the dry upper level trough begins to move east into New England. Florida should remain mostly dry throughout the morning but should see shower activity increasing in the afternoon.

^{***}Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

No Communication Link

Fire Communication Category

Watchout Situation #7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communication(s) be established?
 - Talk about how communications are set up on fires, including the variables that have to be considered.
 - Review situations where communications were a problem and what was done to fix the problem.
 - Do you need a repeater setup or can an experienced firefighter act as a human repeater?
- Is the communication triangle complete?
 - Review the communication triangle, and where it comes up in the "10 Standard Fire Orders" and the "18 Watchout Situations."
 - Discuss ways that firefighters can maintain the communication triangle on the fireline.
- Reduce the risks
 - If the situation is complex, wait until communications are in place.
 - Talk about the fires where crews had to leave the line, didn't go out on the line, or something negative
 happened because communications were inadequate. Discuss what was done to establish communications.
 - Discuss possible scenarios in which communications could be disrupted, and possible solutions.
