

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, October 26, 2018 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial Attack Activity: Light (44) new fires  
 New large incidents: 0  
 Large fires contained: 0  
 Uncontained large fires:\*\* 1  
 Area Command teams committed: 0  
 NIMOs committed: 1  
 Type 1 IMTs committed: 2  
 Type 2 IMTs committed: 2

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

This will be the last daily Incident Management Situation Report. This report will post every Friday at 0800 Mountain Time unless significant activity occurs.

<b>Active Incident Resource Summary</b>

**Southern Area (PL 2)**

New fires: 5  
 New large incidents: 0  
 Uncontained large fires: 0  
 NIMOs committed: 1  
 Type 1 IMTs committed: 2

**FNF Hurricane Michael – Roads**, National Forests in Florida. IMT 1 (Dueitt). Personnel are assessing and repairing damage to trails, roads, infrastructure and recreation areas managed by the Appalachian NF. Road, area and trail closures in effect.

**Chipola Support**, Florida Forest Service. Florida IMT 1 (Mousel). Personnel are coordinating repair and recovery efforts and wildfire response. Road closures in effect.

**Hurricane Florence**, National Forests in North Carolina. NIMO (Houseman). Personnel are assessing and repairing damage to trails, roads and recreation areas managed by the Croatan NF. Road, area, and trail closures in effect.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Service Discussion:** The forecast period begins with a strong high pressure ridge in place over the West and a cool, but not cold trough over the East. Temperatures in the West will be above average in most areas, except in the valley locations where temperature inversions will continue to strengthen. In the East, an area of rain will lift northward along the Atlantic Coast as an occluded front moves north. Some snow might be possible across interior parts of New England Saturday night. A pattern change will begin Monday as the high pressure ridge moves east into the Great Plains and as a cold front moves into the Pacific Northwest. Breezy conditions are expected during the afternoon hours across Oregon, Washington, Idaho, and Montana. With the upper level trough remaining in place over the East, colder air will begin being drawn southward into the Ohio River Valley from Quebec. Some warming will occur around mid-week however, as the high pressure ridge over the Great Plains continues to move east and pushes the trough off shore. A warming trend will also begin along the West coast as another ridge of high pressure approaches the coast. Strong, dry downsloping winds are expected across northern California late in the week.

# LEAD Time

## Leadership Environment

*Leadership Category*

Leadership is defined as the act of influencing people in order to achieve a result. The leadership environment is made up of critical elements that a successful leader must consider in planning for effective action. Those critical elements are:

- **YOU** – the leader, who is ultimately responsible for all action and results.
- **YOUR PEOPLE** – those that you are responsible for.
- **SITUATION** – comprised of the many unique variables that influence a leader's decision such as objectives, conditions, resources available, organizational influences, and others affected by the action.
- **CONSEQUENCES** – the short and long-term effects of your actions.

Leaders constantly assess the elements of the leadership environment and adapt accordingly. Successful leaders understand the interplay of these variables and demonstrate flexibility in selecting appropriate leadership tools and techniques as a situation changes.

### Discussion Points:

- Each mission has a different level risk. Discuss how the four leadership environment elements affect perceived risk in a changing environment.
- Each situation is unique and changes over time. Discuss what changes you might predict in your environment today.
- Discuss what leadership tools might be appropriate for those predicted changes today.
