# National Interagency Coordination Center Incident Management Situation Report Friday, November 9, 2018 – 0800 MT National Preparedness Level 1

### **National Fire Activity**

Initial Attack Activity: Light (201) new fires

New large incidents: 5
Large fires contained: 0
Uncontained large fires:\*\* 4
Area Command teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 3
Type 2 IMTs committed: 0

Link to Geographic Area daily reports.

## Northern California Area (PL 2)

New fires:	77
New large incidents:	1
Uncontained large fires:	1
Type 1 IMTs committed:	1

<sup>\*</sup> **Camp**, Butte Unit, Cal Fire. Cal Fire IMT 1 (Derum). Concow, CA. Chaparral and timber. Extreme fire behavior with wind driven runs, group torching and spotting. Numerous structures threatened. Road closures in effect.

<sup>\*\*</sup>Uncontained large fires include only fires being managed under a full suppression strategy.

#### Southern California Area (PL 2)

New fires:	89
New large incidents:	4
Uncontained large fires:	2
Type 1 IMTs committed:	1

- \* Hill, Ventura County. Cal Fire IMT 1 (Bravo). Six miles northeast of Camarillo, CA. Brush and chaparral. Moderate fire behavior with wind driven runs, spotting and flanking. Structures threatened. Evacuations, road and area closures in effect.
- \* **Woolsey**, Ventura County. Four miles northeast of Oak Park, CA. Brush, chaparral and tall grass. Extreme fire behavior with wind driven runs. Structures threatened. Evacuations in effect.

**Alder**, Sequoia NF. Previously reported incident. Twelve miles northeast of Springville, CA. Timber. Moderate fire behavior with flanking, backing and smoldering. Road closures in effect. Last report unless significant activity occurs.

- \* **Mountaineer**, Sequoia NF. Fourteen miles northeast of Springville, CA. Timber. Moderate fire behavior with flanking, backing and creeping. Trail closures in effect. Last report unless significant activity occurs.
- \* **Eden**, Sequoia & Kings Canyon NP. Seventeen miles northwest of Springville, CA. Timber. Moderate fire behavior with creeping, smoldering and backing. Last report unless significant activity occurs.

#### Southern Area (PL 1)

New fires:	14
New large incidents:	0
Uncontained large fires:	0
Type 1 IMTs committed:	1

**FNF Hurricane Michael – Roads,** National Forests in Florida. Transfer of command from IMT 1 (Dueitt) to the local unit occurred on 10/31. Personnel are assessing and repairing damage to trails, roads, infrastructure and recreation areas managed by the Apalachicola NF. Road, area and trail closures in effect. Last report unless significant activity occurs.

**Chipola Support,** Florida Forest Service. Florida IMT 1 (Dolan). Personnel are coordinating repair and recovery efforts and wildfire response. Road closures in effect.

<sup>\*\*\*</sup> Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Service Discussion: A strong ridge of high pressure will remain anchored just off the West Coast through the weekend and will continue to perpetuate the northerly and offshore flow across northern California and southwestern Oregon. Pockets of critical conditions will remain possible in areas that have not recently received sufficient moisture as Foehn (Santa Ana/Mono/North) Wind events continue through Friday night before relaxing Saturday. The pattern will begin to change Tuesday as the ridge begins to move on shore and inland. As it does so, look for low elevation temperature inversions to strengthen heading toward mid-week. The ridge will briefly weaken Wednesday over the interior west but will again re-intensify during the latter half of the week. This could lead to the season's first widespread fog event across the Pacific Northwest. Across the Great Plains and the East, an overall troughy pattern will set up for the next week and will promote cold, breezy conditions...but not frigid. A significant rain event will be possible along the eastern seaboard Tuesday as a strong cold front approaches from the west. An Alberta Clipper will bring a quick shot of snow to the Great Lakes Region on Thursday.

<sup>\*\*\*</sup>Additional wildfire information is available through the Geographic Areas at <a href="http://gacc.nifc.gov/">http://gacc.nifc.gov/</a>

## **Managing Vehicle Traffic In Smoke**

Vehicles/Roads Category

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke.
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
  - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
  - Notify local law enforcement units and highway departments of a potential problem.
  - Implement preplanned actions such as posting smoke warning signs.
  - Ensure that proper equipment is ready, and appropriate personnel are briefed on contingency plans and are available to control traffic.
