# National Interagency Coordination Center Incident Management Situation Report <br> Tuesday, June 11, 2019 - 0530 MT National Preparedness Level 1 

National Fire Activity
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
Nationally, there are 12 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.

Ten wildland fire suppression crews and twenty-two overhead personnel are assigned to support large fires in Alberta, Canada.

## Southwest Area (PL 3)

New fires: 3
New large incidents: 2
Uncontained large fires: 3
Type 2 IMTs Committed 1
Elk, Gila NF. IMT 2 (SW Team 3). Eighteen miles northeast of Aragon, NM. Timber. Minimal fire behavior with backing, creeping, and smoldering. Structures threatened.

Mountain, Tonto NF. Eight miles northeast of Cave Creek, AZ. Short grass. Minimal fire behavior with smoldering. Road closures in effect.

Maroon, Coconino NF. Thirteen miles northeast of Flagstaff, AZ. Timber. No new information received.

* Bylas, San Carlos Agency, BIA. Twenty-five miles southwest of Datil, AZ. Short grass and brush. Extreme fire behavior with backing. Structures threatened.
* Lone Mountain, Lincoln NF. Fourteen miles northeast of Carrizozo, NM. Timber. Moderate fire behavior with smoldering and creeping. Last narrative report unless significant fire activity occurs.

Predictive Services Discussion: The upper level high pressure ridge and surface thermal trough will reach their peak intensity over the West today and will allow for temperatures to rise to be about 10-15 degrees above average. Very low dew points will allow for significant drying and curing of fine fuels today. A cold front moving east across the Great Plains will bring scattered showers and storms from the Texas Panhandle north into the Dakotas. The very wet, stormy pattern across eastern portions of the Southeast will continue as a front remains stalled along the Atlantic Coast. Breezy southwesterly flow will be possible across the northern Interior of Alaska as a powerful cold front moves east along the Arctic Coast between Barrow and Prudhoe Bay. Scattered wet storms will be possible across the southeastern Interior as some moisture manages to make it across the Wrangell Saint Elias Mountains in a moist southerly flow.

# Hazardous Materials Encounters 

Miscellaneous Fireline Hazards

Employees who may encounter hazardous materials in the field should be trained, as mandated by OSHA 1910.120 (q), First Responder Awareness Level. However, employees should always recognize that hazmat encounters require special precautions.

- Hazardous materials in the field include, but are not limited to:
- Clandestine drug waste - waste as a result of "meth" labs, etc., which may look like common household trash at first glance. Drug lab waste can be identified by the presence of gallon plastic jugs, large plastic bags, 5 -gallon buckets, and laboratory equipment (tubes and beakers).
- Midnight dumping - may be recognized by the presence of barrels or other containers, discoloration of land, plants, or water, and/or dead vegetation and animals.
- Transportation accidents - truck, rail, or pipeline accidents may result in the spillage or release of hazardous materials that may result in danger to life, property, or resources.

In all instances, self-protection is your primary responsibility.
Respond to all encounters by implementing the Three Rs:

- Recognize: Attempt to identify the substance using the North American Emergency Response Guide, occupancy/location, placards/labels, container shapes/colors, and/or MSDS shipping papers.
- Retreat: Move upwind, upgrade, or upstream; isolate the material; and deny entry to the site. Guidelines for isolation distances include: 150 feet for a minor incident ( 1 drum, 1 bag, etc.); 500 feet for a major incident (more than 1 drum, etc.); 300 feet for a residential and light commercial incident; 1,000 feet for an open area; 2,500 feet for an incident with BLEVE potential; 2,500 feet for the staging area (must be upwind with vehicles in a headed-out position).
- Report: Notify your supervisor and agency dispatcher. Request hazmat assistance via a safe route.
