# National Interagency Coordination Center Incident Management Situation Report <br> Wednesday, June 12, 2019 - 0530 MT <br> National Preparedness Level 1 

National Fire Activity
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
Nationally, there are 13 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.

Ten wildland fire suppression crews and twenty-two overhead personnel are assigned to support large fires in Alberta, Canada.

## Southwest Area (PL 3)

New fires:
New large incidents:
Uncontained large fires:
Type 1 IMTs Committed
Type 2 IMTs Committed

Woodbury, Tonto NF. Ten miles northwest of Superior, AZ. Previously reported incident. IMT 1 (SW Team 2). Short grass and brush. Active fire behavior with wind driven runs, running and flanking. Structures threatened. Road and trail closures in effect.

Elk, Gila NF. IMT 2 (SW Team 3). Eighteen miles northeast of Aragon, NM. Timber. Minimal fire behavior with backing, creeping and smoldering. Structures threatened.

Mountain, Tonto NF. Eight miles northeast of Cave Creek, AZ. Short grass. Minimal fire behavior with smoldering.

Bylas, San Carlos Agency, BIA. Twenty-five miles southwest of Datil, AZ. Short grass and brush. Moderate fire behavior with backing, smoldering and creeping. Structures threatened.

* AZ-CNF-000252, Coronado, NF. Ten miles southwest of Tubac, AZ. Short grass and brush. Moderate fire behavior with running and creeping.

Maroon, Coconino NF. Thirteen miles northeast of Flagstaff, AZ. Timber. No new information. Last report unless new information is received.

Predictive Services Discussion: Storm activity across the Alaskan Interior will be on the increase as a weakening low pressure area moves north across the Gulf toward Valdez and Cordova. The cold front along the Arctic Coast will move east from Prudhoe Bay toward AWNR and will keep a breezy westerly flow in place. The high pressure ridge over the western CONUS will weaken as it moves east toward the Continental Divide. Portions of Northern California and southwestern Oregon could see an increase in initial attack with the arrival of widely scattered storms in the afternoon coming from an approaching disturbance. Scattered showers and storms will persist across the East as another cold front approaches from the Great Plains.

## Dozer/Plow Operations

Vehicles \& Roads Category

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety.
- Do not use a dozer or tractor plow without a canopy or brush guard, and radio communications.
- Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.
- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.
