# National Interagency Coordination Center Incident Management Situation Report <br> Thursday, June 13, 2019 - 0530 MT <br> National Preparedness Level 2 

National Fire Activity
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:**
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
Nationally, there are 14 large fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.

Ten wildland fire suppression crews and 22 overhead personnel are assigned to support large fires in Alberta, Canada.

## Southwest Area (PL 3)

New fires:
New large incidents:
Uncontained large fires:
Type 1 IMTs Committed
Type 2 IMTs Committed

Woodbury, Tonto NF. IMT 1 (SW Team 2). Ten miles northwest of Superior, AZ. Short grass, brush and chaparral. Active fire behavior with uphill runs, flanking and backing. Numerous structures threatened. Road and trail closures in effect.

Elk, Gila NF. IMT 2 (SW Team 3). Eighteen miles northeast of Aragon, NM. Timber. Minimal fire behavior with backing, creeping and smoldering. Structures threatened.

Bylas, San Carlos Agency, BIA. Twenty-five miles southwest of Datil, AZ. Short grass and brush. Moderate fire behavior with backing, smoldering and creeping. Structures threatened.

Hells Gate, Coronado NF. Ten miles southwest of Tubac, AZ. Short grass and brush. Minimal fire behavior with smoldering and creeping. Reduction in acreage due to more accurate mapping.

Mountain, Tonto NF. Eight miles northeast of Cave Creek, AZ. Short grass. No new information.

Predictive Services Discussion: Slightly cooler temperatures are expected across the West as the passing disturbance flattens the upper level high pressure ridge and weakens the thermal trough over the Great Basin. Isolated storms will be possible across northern California and the Great Basin in the afternoon and evening hours. Windy conditions are expected across the Mid-Atlantic States and the Ohio River Valley as a strong trough moves northeast into New England. Weak high pressure ridging over the southwestern interior of Alaska will suppress afternoon convection across much of the state. Activity should be isolated and limited mainly to the southeastern Interior. Breezy westerly winds are expected along the North Slope.

Fight Fire Aggressively, But Provide For Safety First<br>Operational Engagement Category

Standard Fire Order \#10 must be taken into account at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Ask yourselves, are we making progress? Are we beating our heads against a wall? Is there a better way to get this done? Give examples when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Ask yourselves, do we need to retreat and reevaluate? Talk about times when you have realized you weren't getting anywhere and needed to retreat and start managing firefighters and placing orders.
- Are lookouts posted? Discuss when you post lookouts, who you would choose to be a lookout, and where they should be located.
- Are communications prompt with crews and other resources? Review the importance of good communications on the fireline.
- Have escape routes and safety zones been established? Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment? Discuss the situation check. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
- Post lookouts.
- Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
- Do you have established trigger points?
