

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 23, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (87) new fires
New large incidents:	1
Large fires contained:	0
Uncontained large fires:**	8
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nationally, there are 17 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Alaska Area (PL 4)

New fires: 14
 New large incidents: 0
 Uncontained large fires: 3
 Type 2 IMTs Committed: 2

Swan Lake, Kenai-Kodiak Area, Alaska DOF. IMT 2 (AK Black Team). Six miles northeast of Sterling, AK. Timber and short grass. Active fire behavior with backing, flanking and torching. Numerous residences and structures threatened. Road, area and trail closures in effect.

Shovel Creek, Fairbanks Area Zone, Alaska DOF. IMT 2 (AK Green Team). Twenty miles northwest of Fairbanks, AK. Timber. Extreme fire behavior with running, spotting and torching.

Caribou Creek, Fairbanks Area Zone, Alaska DOF. Twenty miles northeast of North Pole, AK. Tall grass and timber. Active fire behavior with torching and creeping. Residences threatened.

Kuyukutuk River, Galena Zone, BLM. Twenty miles northwest of Russian Mission, AK. Tall grass and timber. No new information. Last report unless new information is received.

Predictive Services Discussion: A warming trend will occur across the West as a weak high pressure area builds inland from the coast. Temperatures should return to normal levels. Near critical conditions along the West Coast will subside as an onshore flow develops. While isolated storms are expected along the Continental Divide, the remainder of the West should be mostly dry. In the East, hot and humid conditions will continue as high pressure remains firmly entrenched. In Alaska, most of the previous days' moisture supply for convection will move off to the southeast into Canada. However, isolated storms will remain possible across the eastern Interior from the Upper Yukon south to Tok. Isolated storms are also possible in the Mat-Su Valley.

Driving Safety

Vehicles/Roads Category

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- To be a safe driver you have to *want* to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
- Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.
 - ✓ Drive only when you are well rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours.
 - ✓ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
 - ✓ Never drive when taking medications that make you drowsy.
 - ✓ Delegate navigation and communication to a passenger or pull over.
 - ✓ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
 - ✓ Avoid eating or drinking while driving.
 - ✓ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
 - ✓ Switch off driving with others if multiple people are in the vehicle.
 - ✓ Do not be in a hurry, be patient.
- Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.
