

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, July 18, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (144) new fires
New large incidents:	3
Large fires contained:	3
Uncontained large fires:**	13
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nationally, there are 84 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Alaska Area (PL 5)

New fires:	18
New large incidents:	1
Uncontained large fires:	4
NIMOs Committed:	1
Type 2 IMTs Committed:	3

Shovel Creek, Fairbanks Area, Alaska DOF. IMT 2 (NR Team 6). Twenty miles northwest of Fairbanks, AK. Timber and brush. Minimal fire behavior with creeping, smoldering and isolated torching. Residences threatened.

Swan Lake, Kenai-Kodiak Area, Alaska DOF. IMT 2 (EA Gold Team). Started on FWS land six miles northeast of Sterling, AK. Timber and short grass. Moderate fire behavior with creeping, smoldering and backing. Numerous structures threatened. Area, road and trail closures in effect.

Chalkyitsik Complex (4 Fires), Upper Yukon Zone, BLM. IMT 2 (AK Black Team). Fifteen miles east of Chalkyitsik, AK. Timber. Active fire behavior with running, backing and flanking. Numerous structures threatened.

Boundary River, Tok Area, Alaska DOF. NIMO (Portland). IMT is also managing the McArthur Creek incident. Started on Native Corporation land 37 miles southeast of Tok, AK. Timber and short grass. Minimal fire behavior with smoldering. Residences threatened. Precipitation occurred over the fire area yesterday.

McArthur Creek, Tok Area, Alaska DOF. Twenty-five miles northeast of Northway, AK. Timber, brush and short grass. Minimal fire behavior with smoldering. Structures threatened.

Kobe, Fairbanks Area, Alaska DOF. Twenty-five miles northwest of Healy, AK. Timber and tall grass. Moderate fire behavior. Reduction in acreage due to more accurate mapping.

McCally Creek, Southwest Area, Alaska, DOF. Previously reported incident. Started on Native Corporation land one mile south of Red Devil, AK. Timber. Moderate fire behavior with smoldering. Residences threatened. Last narrative report unless significant activity occurs.

Montana Creek, Mat-Su Area, Alaska DOF. Started on private land 13 miles south of Talkeetna, AK. Timber and brush. Minimal fire behavior with smoldering. Residences threatened.

* **Garnet Creek**, Tanana Zone, BLM. Twelve miles southeast of Rampart, AK. Timber. Moderate fire behavior with creeping. Residences threatened. Last narrative report unless significant activity occurs.

Predictive Services Discussion: A few more days of warm temperatures will continue across the interior of Alaska before showers and cooler weather move in for the weekend. Strong westerly winds continue across the Northern Rockies and eastern Idaho/Wyoming on Thursday. Most of the West will remain dry with seasonal temperatures. Monsoonal moisture remains limited and spotty across the southwest U.S. through at least Friday.

Initial Attack Sizeup/Safety

Operational Engagement Category

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

Use the following reporting factors for size-up and reference local fire size-up cards. Discuss others that may be used.

- Fire name and location
- Terrain (slope, aspect, elevation) and position of fire on the slope
- Size of fire
- Fuel type, anticipated control problems, and spread potential
- Values threatened
- Weather conditions (wind speed and direction)
- Fire behavior
- Resources on the fire and those needed
- Estimated containment and control times
- Cause (known, suspected, under investigation)

After your initial size-up of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.

- Have you sized up the fire and relayed the information to dispatch?
- Is the observed fire weather consistent with the forecast?
- Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
- Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
- Are lookouts in place or can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Do you have a complete list of what resources have been ordered for the fire?
- Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
