

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, August 3, 2019 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (134 new fires)
New large incidents:	6
Large fires contained:	6
Uncontained large fires:**	13
Area Command teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

Nationally, there are 77 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Northwest Area (PL 2)**

New fires: 17  
 New large incidents: 3  
 Uncontained large fires: 5  
 NIMOs committed: 1  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 2

\* **Williams Flats**, Colville Agency, BIA. IMT 2 (NW Team 8). Five miles southeast of Keller, WA. Timber, brush and tall grass. Extreme fire behavior with wind-driven runs, short crown runs and short-range spotting. Structures threatened. Evacuations, area and road closures in effect.

\* **Sulphur**, Washington State Fire Marshal’s Office. Started on private land six miles southeast of Connell, WA. Brush and tall grass. Active fire behavior with running. Residences threatened.

**MP 97**, South Unit, Oregon DOF. IMT 1 (ODF Team 3). One mile south of Canyonville, OR. Timber. Moderate fire behavior with group torching, uphill runs and smoldering. Numerous residences threatened.

\* **E Evans Creek Fire**, Medford Unit, Oregon DOF. Ten miles northwest of Sams Valley, OR. Timber, chaparral and brush. Active fire behavior with running, spotting and torching. Structures threatened. Evacuations in effect.

**Devore Creek**, Okanogan-Wenatchee NF. NIMO (Phoenix). Three miles southwest of Stehekin, WA. Timber and brush. Minimal fire behavior with creeping, smoldering and single tree torching. Trail closures in effect.

**Left Hand**, Okanogan-Wenatchee NF. IMT 2 (NW Team 7). Seventeen miles northwest of Naches, WA. Timber and hardwood litter. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Evacuations, area and road closures in effect. Reduction in acreage due to more accurate mapping.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** Scattered monsoonal convection will continue across the Four Corner states, Wyoming, eastern Idaho and Montana, as the high pressure ridge remains stationary over the Four Corners and continues to pump moisture northward into central Canada. Storms will be mostly wet except along the western fringes where they will be dry. Isolated dry storms will be possible across portions of the southern Sierra, but they should be focused over the higher terrain where fuels are not as receptive. In the East, a trough of low pressure will remain entrenched over areas east of the Mississippi River. A stalled frontal boundary will lead to scattered storms up and down the East Coast from New England south to Florida. In Alaska, a cold front will sweep east across the state bringing widespread showers. West winds will become breezy in the afternoon.

## Refusing Risk

### *Operational Engagement Category*

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

- A turn down is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.
- A turn down must be based on an assessment of risks and the ability of an individual or organization to control those risks.
- A situation may be a candidate for a turndown if:
  - There is a violation of safe work practices.
  - Environmental conditions make the work unsafe.
  - The forces lack the necessary qualifications or experience.
  - Defective equipment is being used.
- The following steps will be used when turning down an assignment:
  - The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
  - Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
  - If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
  - The safety hazard should be documented by the submission of a SAFENET or SAFECOM.
- These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
