*1 Hectare = 2.47 Acres
Predictive Services Discussion: The Four Corners High will begin to drift north across Colorado. As it does so, it will draw monsoonal moisture north from Arizona and New Mexico as far north as south central Montana. Widely scattered storms are expected along the Continental Divide in the afternoon. In California, Sundowner winds are expected as a strong north to south oriented pressure gradient develops north of Santa Barbara. Showers and storms will continue cross the East as a stationary front lingers over the region.

# Responding To Vehicle Fires 

Vehicles - Roads Category

Suppression of vehicle fires is extremely dangerous and poses many health and safety hazards to firefighters. The following procedures are recommended:

- Wear a high visibility reflective vest or other high visibility clothing if available.
- Secure the scene and provide or request assistance for traffic control.
- Park your vehicle to provide a protective barricade for you and your crew. Position it so that an inattentive or drunk driver will hit your vehicle and not your crew. Your vehicle is expendable, you are not.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle.
- DO NOT BREATHE ANY SMOKE. Smoke from vehicle fires contains toxic chemicals that will kill you.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-feet minimum), and avoid contact with vehicle fire smoke or fumes.
