

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, August 31, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (136 new fires)
New large incidents:	3
Large fires contained:	4
Uncontained large fires:***	13
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5

Nationally, there are 36 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

One IMT 1 (NR Team 2) and two Type 1 hand crews have mobilized in support of Hurricane Dorian ESF #4 recovery efforts and are awaiting assignments from FEMA.

Alaska Area (PL 3)

New fires:	1
New large incidents:	0
Uncontained large fires:	3
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Swan Lake, Kenai Kodiak Area, Alaska DOF. IMT 1 (GB Team 1). IMT is also managing the Caribou Lake incident. Started on FWS land five miles northeast of Sterling, AK. Timber, brush and short grass. Moderate fire behavior with single tree torching, backing and creeping. The communities of Sterling and Cooper Landing and numerous structures threatened. Area, road and trail closures in effect.

Caribou Lake, Kenai-Kodiak Area, Alaska DOF. Seven miles northwest of Fox River, AK. Heavy logging slash, timber and tall grass. Minimal fire behavior with creeping and smoldering. Structures threatened.

McKinley, Mat-Su Area, Alaska DOF. IMT 2 (AK Green Team and NR Team 7). Started on private land 18 miles north of Willow, AK. Timber and brush. Moderate fire behavior with backing, creeping and single tree torching. Numerous residences threatened. Reduction in acreage due to more accurate mapping.

Deshka Landing, Mat-Su Area, Alaska DOF. IMT 2 (NW Team 10). Seven miles southwest of Willow, AK. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Levelock, Southwest Area, Alaska DOF. Previously reported incident. Started on Native Corporation land one mile northwest of Levelock, AK. Timber and short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

Ethel Creek, Southwest Area, Alaska DOF. Previously reported incident. Fifty-three miles northeast of Nondalton, AK. Timber and tall grass. Moderate fire behavior with flanking and backing. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Hurricane Dorian will turn west as it sets its sights on the central Atlantic Coast of Florida. Main impacts today will be from possible beach erosion, as the storm is still at least a day or two away from making landfall. The Four Corners High will migrate east to the Four Corners. This will allow for some cooling across the Pacific Northwest and extreme northwestern portions of the Great Basin. A strengthening area of low pressure will drop south along the coast of British Columbia, allowing for cooler air to move into areas west of the Cascade Crest. The breezy conditions across the upper Midwest and New England will subside. South central Alaska will see a break in the precipitation early in the day; however, precipitation will resume overnight as a stronger system moves in from the southwestern Interior.

Unburned Fuel Between You And The Fire

Operational Engagement Category

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
 - Post lookouts.
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
