Predictive Services Discussion: The previous day's low pressure area will split into two systems over the Pacific Northwest with the stronger system remaining along the coast. As this occurs, widespread precipitation will develop over the northern Great Basin, Northern Rockies and the Pacific Northwest. Breezy west winds will develop over California and Nevada, but with below average temperatures in place, humidity levels will be slightly elevated. Monsoonal moisture will move into West Texas and will provide much needed rainfall to areas west of a line going from Abilene to San Antonio, including the Texas Panhandle to the north. Hot and humid conditions are expected across the southeast and the Mid-Atlantic States as high pressure over the region strengthens.

We all know someone who has considered suicide, attempted suicide or sadly died from suicide. We just may not know that we know someone.....or maybe you are that someone.
- Suicide is the \(10^{\text {th }}\) leading cause of death in the US and according to a report from Vox, more first responders die by suicide than in the line of duty each year. It is believed that the estimated deaths of fire/EMS is underestimated by up to \(60 \%\) each year.
- Firefighters have higher rates of PTSD, depression, anxiety and alcohol use disorders that contributes to the high suicide rate.

How do we change these statistics? Through real conversations. By recognizing that we need to talk openly about suicide and mental health because one suicide, is one too many.

You don't have to be concerned about a co-worker, friend or family member to start talking about suicide and mental health. By opening up the door and addressing these concerns we change the statistics.

The goal for 2020 is no suicides, let's start talking and make that happen.

\section*{Real conversations; Remove the stigma}

When we talk about it, we remove the stigma. If you have a friend, co-worker or family member that you are concerned about, here is a short video on how to talk to them about suicide:
