

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 14, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (118 new fires)
New large incidents:	0
Large fires contained:	4
Uncontained large fires:***	13
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

Nationally, there are 43 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires:	24
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed	1
Type 2 IMTs committed:	2

Walker, Plumas NF, USFS. IMT 1 (CA Team 4). Eleven miles east of Taylorsville, CA. Timber and medium logging slash. Active fire behavior with isolated torching, uphill runs and flanking. Structures threatened. Evacuations, area and road closures in effect.

Lime, Klamath NF, USFS. IMT 2 (CA Team 15). IMT is also managing Kidder 2 incident. Ten miles north of Yreka, CA. Timber and brush. Minimal fire behavior with backing, creeping and smoldering. Area closures in effect.

Kidder 2, Klamath NF, USFS. Ten miles northwest of Etna, CA. Timber and brush. Minimal fire behavior with backing, creeping and smoldering. Area closures in effect.

South, Shasta-Trinity NF, USFS. IMT 2 (CA Team 16). Fifteen miles south of Platina, CA. Timber, chaparral and hardwood litter. Active fire behavior with uphill runs, torching and running. Structures threatened.

Lone, Modoc NF, USFS. Five miles southeast of Clear Lake, CA. Timber, brush and tall grass. Moderate fire behavior with creeping and isolated torching. Sage-grouse habitat threatened.

Middle, Shasta-Trinity NF, USFS. Eleven miles northeast of Junction City, CA. Timber and brush. Minimal fire behavior with backing, creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

Predictive Services Discussion: A breezy westerly flow will continue across the northern tier of the country as a weakening cold front moves east across the Upper Midwest in the afternoon. Temperatures across the western half of the country will remain near average, which means that California will also see some cooling effects. Texas will remain hot and dry under a high-pressure area. In the East, the Bermuda high will continue to drift east and into the Atlantic which may allow for some slight lessening of the heat across the Southeast. While warm conditions are also expected across the Northeast, a breezy westerly flow will offset some of the effects of the heat.

Building Fireline Downhill With Fire Below

Operational Engagement

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and down slope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below? How many resources do you want to engage?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing, where they are getting their information and where and when it might occur.
