

**National Interagency Coordination Center
Incident Management Situation Report
Friday, September 20, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (102 new fires)
New large incidents:	2
Large fires contained:	5
Uncontained large fires:***	11
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

Nationally, there are 39 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 2)

New fires: 10
 New large incidents: 0
 Uncontained large fires: 3
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

Walker, Plumas NF, USFS. Transfer of command from IMT 1 (CA Team 4) to IMT 2 (CA Team 10) will occur today. Eleven miles east of Taylorsville, CA. Timber and medium logging slash. Minimal fire behavior with creeping, smoldering and backing. Road and area closures in effect. Precipitation occurred over the fire area yesterday.

South, Shasta-Trinity NF, USFS. IMT 2 (CA Team 16). Fifteen miles south of Platina, CA. Timber, chaparral and hardwood litter. Minimal fire behavior with smoldering and creeping. Residences threatened. Area, road and trail closures in effect.

Middle, Shasta-Trinity NF, USFS. Eleven miles northeast of Junction City, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Lime, Klamath NF, USFS. Ten miles north of Yreka, CA. Timber and brush. Minimal fire behavior.

Kidder 2, Klamath NF, USFS. Ten miles northwest of Etna, CA. Timber and brush. Minimal fire behavior. Last narrative report unless significant activity occurs.

Predictive Services Discussion: The slight warming trend along the West Coast will continue as the ridge of high pressure off shore begins to drift east toward the coast of the Pacific Northwest and Northern California. The broad, cool upper level trough will continue to drift east into the Great Plains from the Continental Divide bringing cooler than average conditions, showers, and storms further inland. Some storms across the Dakotas will be strong. The tropical wave over eastern Texas will move into Louisiana while the high-pressure ridge over the east maintains its strength for another day. Look for the hot and dry conditions to continue across the Deep South, Mid-Atlantic States and New England. In Alaska, another Aleutian low-pressure area will move east into the northern Gulf of Alaska and will spread showers across the northern and eastern coastal areas. Most precipitation, however, should remain south of the Alaska Range.

ATV – Safety

Vehicles/Roads Category

The use of ATVs for wildland fire suppression and prescribed fire operations has increased dramatically over the last ten years. Note: Several agencies have required training for ATV operations (check your agency's requirements).

Most injuries associated with ATVs occur when:

- the driver loses control (When the operator encounters a change of terrain or swerves to avoid an obstacle, it causes an abrupt change of balance and loss of control),
- the vehicle rolls over,
- the driver or passenger is thrown off,
- the operator's loss of attention to what, where, and how an ATV is being operated,
- or there is a collision with a fixed object.

Identified contributing factors to ATV accidents include:

- rider inexperience,
- excessive speed combined with rough terrain, can create enough pitch and bounce to cause the operator to lose control of the vehicle,
- lack of helmet use,
- the ATV is improperly loaded or load weight exceeds vehicle operation capacity,
- or the operator carries a passenger that affects the operators control and operation of the ATV.

Safety measures for ATV use include:

- Conduct pre-ride inspection which should include checking tires, throttle cable, front and rear brakes, lights and switches, oil and fuel, chain or drive shaft, air filter, clean out of weeds and other debris from around engine and other hot components, and the chassis for any defects or wear.
- Single riders only – Injuries frequently occur to passengers, therefore riding double should not be permitted.
- Always wear PPE – helmets, eye protection, and protective clothing. Appropriate helmets are those designed for motorcycle (not firefighting) use, and should include safety visors/face shields, goggles, or safety glasses for eye protection.
- Use headlights to improve visibility by other vehicles.
- Maintain speeds acceptable for riding conditions, especially over uneven terrain.
- Traversing slopes should be avoided.
- Mounted or towed loads should not exceed manufacturer's recommendation and should be properly mounted so that weight transfer does not affect the center of gravity of the machine – mounting a tank (e.g., drip torch) on the rear of the vehicle increases the chances for a rear turnover.
- Do not drive on public roads – collisions with automobiles on public roads are the most common cause of fatal ATV accidents. It may be illegal to operate an ATV on public roads – check your state's laws.
