### National Interagency Coordination Center Incident Management Situation Report Thursday, September 26, 2019 – 0530 MT National Preparedness Level 2

### **National Fire Activity**

Initial attack activity:

New large incidents:

Large fires contained:

Uncontained large fires:\*\*\*

Area Command teams committed:

NIMOs committed:

Moderate (208 new fires)

1

2

0

0

Type 1 IMTs committed: 0
Type 2 IMTs committed: 1

Nationally, there are 34 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

Ten Year Average Fires (2009 – 2018 as of today)	49,748
Ten Year Average Acres (2009 – 2018 as of today)	6,187,861

<sup>\*\*\*</sup>Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

<u>Predictive Services Discussion:</u> Breezy conditions will continue across the northern tier of the country as a weak but moist cold front drops south from the Canadian Great Plains into Montana and the Dakotas during the afternoon. Showers and storms will accompany the leading edge of the system as it moves south into Wyoming and the Dakotas by afternoon. North winds will continue across Northern California as the high-pressure ridge remains just off shore. Scattered showers and storms will continue over Arizona and the desert of southern California as the low-pressure area slowly drifts east across the state. A passing front will bring scattered showers and storms to the Appalachians; however, little drought relief is expected. Wet conditions are expected across New England as a cold front moves east to the coast by afternoon.

<sup>\*\*\*</sup>Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

## In Country Not Seen In Daylight

Operational Engagement Category

Often firefighters arrive on a fire after dark. This is recognized as Watchout Situation #2. Before safely fighting fire in country not seen in daylight, firefighters must be able to answer the following questions:

- Can the resources you are replacing give you a thorough briefing? Identify whom you might get information from. Can you meet up with the departing overhead/resource leaders?
- Can you observe the area/use scouts? List ways you could observe the area you need to work.
- Have escape routes and safety zones been thoroughly scouted and marked for night use? Talk about what constitutes an escape route and a safety zone; who would identify them; and in what ways might they be marked.
- Have potential dangers been located; can they be mitigated? What are the dangers associated with Watchout Situation #2? How can they be worked around?
- Reduce the risks by:
  - Posting lookouts.
  - Checking communications.
  - Retreat if you have doubts about your escape routes or safety zones, or the situation becomes too complex. Give examples of arriving on a fire after dark and what was done to allow you to fight fire safely in country not seen in daylight.
  - Identifying prominent geographic features.
