

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 28, 2019 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (127 new fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:***	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 25 large fires being managed under a strategy other than full suppression.
*** Uncontained large fires include only fires being managed under a full suppression strategy.

Ten Year Average Acres (2009 – 2018 as of today)	6,199,658

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: The next system to impact the northwestern states will quickly intensify during the predawn hours as it moves into the Pacific Northwest. Cold air from Canada will be pulled south into Washington, northern Idaho and northern Montana and will allow for locations along the Canadian border to see an early season snow, even in the lower elevations. Very strong northerly/northeasterly winds across Montana will create whiteout conditions across northern portions of the state. Temperatures across the remainder of the West will also cool dramatically, though not as much as the northern tier states. In the East, record heat will continue to gradually increase fire danger across the Deep South and in the southern Appalachians. This will be a day of dramatic extremes in weather.

LEAD Time

Developing a Learning Organization

Leadership Category

Leaders evaluate performance at all levels to understand the causal factors of successes and failures. All those involved learn incrementally, applying today's lessons to the next assignment. This focus on continuous improvement brings with it a responsibility to share lessons learned throughout the organization.

In a learning organization, leaders treat honest mistakes as opportunities to learn and do better next time. Understanding that failure is a part of learning, they establish command climates in which followers are motivated by desire to succeed rather than fear of failure. At the crew level, conducting regular After Action Reviews is one of the most powerful tools a leader has for building effective and cohesive teams.

Discussion Points:

- Discuss the relationship between developing a learning organization and safety.
- What happens when honest mistakes are punished rather than used as a learning opportunity?
- How are mistakes and failure dealt with within your crew / organization?
- What was your crew's/organization's most recent learning moment?
