

**National Interagency Coordination Center
Incident Management Situation Report
Friday, October 11, 2019 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (114 new fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires:***	9
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Nationally, there are 8 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Rocky Mountain Area (PL 2)

New fires:	1
New large incidents:	0
Uncontained large fires:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Decker, Rio Grande NF, USFS. IMT 1 (RM Type 1). Nine miles south of Salida, CO. Timber and light logging slash. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Evacuations, area, road and trail closures in effect. Sage-grouse habitat threatened. Precipitation occurred over the fire area yesterday

Middle Mamm, White River NF, USFS. IMT 2 (RM Team Black). Eleven miles south of Rifle, CO. Timber and brush. Moderate fire behavior with smoldering. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Incident Name	Unit	Size		%	Ctn/Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

Southern California Area (PL 2)

New fires:	17
New large incidents:	2
Uncontained large fires:	4

Briceburg, Merced-Mariposa Unit, Cal Fire. Eight miles north of Mariposa, CA. Brush and tall grass. Active fire behavior with uphill runs and spotting. Numerous structures threatened. Evacuations, area and road closures in effect.

* **Sandlewood**, Riverside Unit, Cal Fire. Eight miles northeast of Moreno Valley, CA. Brush and tall grass. Extreme fire behavior with wind driven runs and spotting. Numerous structures threatened. Evacuations and road closures in effect.

* **Reche**, Riverside Unit, Cal Fire. Two miles north of Moreno Valley, CA. Brush and tall grass. Moderate fire behavior with uphill runs. Numerous structures threatened. Evacuations and road closures in effect.

Taboose, Inyo NF, USFS. Previously reported incident. Six miles southwest of Big Pine, CA. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Area closures in effect.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: The Diablo and Santa Ana wind event across California will begin to weaken as the day goes on as pressure gradients over Nevada begin to relax. However, critical fire weather concerns will continue through Friday, as the easterly winds remain strong. The weekend weather will be quiet across the country under a moderating westerly flow except across the western portion of the Great Lakes where a stalled low-pressure area will continue to dump snow. A warming trend will begin in the West as high pressure begins to amplify over the region where it will linger through mid-week. In the East, the breezy westerly flow will bring a chance for much needed precipitation to the southern Appalachians Wednesday night. However, amounts will not be sufficient to quell the elevating fire potential. The next, big and wet system will move onto the West Coast on Thursday. Widespread valley rain and high elevation snow will be possible from British Columbia to California.

Medical Incident Report

Fire Communication Category

The new Medical Incident Report (MIR) form can be found at all of the following: pages 108-09 of the IRPG, Medical Plan ICS-206 WF form and in many Incident Action Plans (IAPs). The MIR evolved from, and has replaced, the "9 Line Form" and "Pink Sticker".

The MIR is not always tasked to the EMT or Paramedic in "Patient Care". The intent of the form is to:

- 1) establish control of the incident whether routine or life-threatening by initiating a new Incident Command System,
 - 2) have a systematic standard process for reporting medical incidents/injuries, similar to a fire size-up form for initial attack, and
 - 3) have any firefighter be able to fill it out and transmit with prior training and direction.
- Treat it like any incident. If the incident is overwhelming, ask for a more qualified IC to assume command and expand/contract the organization's size depending on the needs of the incident.
 - Fill this form out completely prior to transmitting the report to dispatch/communications. If there is a life threat, do not let documentation delay patient care.
 - When transmitting the report, state the number and title of each section and say "break" and pause between the sections (e.g., "*Dispatch, TFLD Jones, Stand by for Priority Medical Incident Report. All other radio traffic please hold **BREAK** (pause/wait for response.)* **2. Incident Status:** Nature of Illness is chest pain. Incident Name is Tank Medical. IC will be TFLD Jones. Patient Care will be Paramedic Smith. **BREAK.** **3. Initial Patient Assessment** is...").
 - When using the MIR during a Multi-Casualty Incident (MCI) state the number injured and their severity (Section 3), (e.g., "**3. Initial Patient Assessment**, I have 5 patients. 3 Reds, 1 Yellow and 1 Green. Mechanism of Injury is...").
 - Use the terms Paramedic or EMT with the provider's last name in "Patient Care." Do not use EMT to describe a Paramedic or the ambiguous term, "Medic." All those roles need to be clearly identified to understand the level of care and treatment the patient(s) will receive.
 - Enact more than one transport plan and clear more than one frequency if needed for Sections 5 and 6.
 - Always be ready for the first plan to fail and be flexible enough to move into an alternate plan. Use the acronym PACE (**P**rimary, **A**lternate, **C**ontingency, and **E**mergency) for planning purposes.

Action Items:

- Consider developing medical emergency tabletop scenarios as part of morning briefings or field scenarios on project work to become familiar with the process. The more comfortable with the MIR you are, the more it will be second nature under stress.
- Ensure dispatchers and radio operators are aware of their roles and responsibilities pertaining to the Medical Incident Report.
- Review your local units' Emergency Plans.

This topic was submitted by AFMO Miles Ellis and Asst. State FMO Paul Hohn with Wyoming BLM and expanded upon by Grand Canyon Helitack's Eric Graff.
