

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, October 23, 2019 – 0800 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (44 new fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:***	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Nationally, there are 7 large fires being managed under a strategy other than full suppression.
*** Uncontained large fires include only fires being managed under a full suppression strategy.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: The top weather issue of the day remains the dry conditions and local terrain-influenced winds in California. Weak to locally-moderate offshore Santa Ana winds in Southern California will continue today, with wind speeds gusting between 15 and 25 mph. The wind speeds will increase overnight, however, to as high as 40 to 65 mph by Thursday morning. Further north, the easterly Mono winds of central California will build through the day to reach gusts of 30 to 45 mph by late afternoon. These strong winds coincide with hot temperatures and relative humidities ranging from the teens in central California down to the high single digits in the south. Accordingly, Red Flag Warnings are in effect for these parts of California today for hot, dry, and windy conditions.

No Communication Link

Fire Communication Category

Watchout Situation #7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communication(s) be established?
 - Talk about how communications are set up on fires, including the variables that have to be considered.
 - Review situations where communications were a problem and what was done to fix the problem.
 - Do you need a repeater setup or can an experienced firefighter act as a human repeater?

- Is the communication triangle complete?
 - Review the communication triangle, and where it comes up in the "10 Standard Fire Orders" and the "18 Watchout Situations."
 - Discuss ways that firefighters can maintain the communication triangle on the fireline.

- Reduce the risks
 - If the situation is complex, wait until communications are in place.
 - Talk about the fires where crews had to leave the line, didn't go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications.
 - Discuss possible scenarios in which communications could be disrupted, and possible solutions.
