# National Interagency Coordination Center Incident Management Situation Report Sunday, November 3, 2019 – 0800 MT National Preparedness Level 2

# **National Fire Activity**

Nationally, there are 5 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

<sup>\*\*\*</sup>Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

<u>Predictive Services Discussion</u>: The ridge of high pressure just off the West Coast will retreat to the west, and the trough of low pressure over the Great Plains and Upper Midwest will begin to flatten out as well. This will produce a much flatter westerly to northwesterly flow pattern over much of the country. Winds across most of the nation will be breezy. Outside of a few locations near the Great Lakes, the remainder of the country will be dry. Expect near-average temperatures in all areas except across California and Oregon where temperatures will remain above average. No significant fire weather impacts are expected today.

http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

<sup>\*\*\*</sup>Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

# **Operational Briefings**

Fire Communications Category

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the cover of the NWCG Incident Response Pocket Guide:

#### Situation:

- Fire name, location, map orientation, other incidents in the area
- Terrain influences
- Fuel type and conditions
- Fire weather (previous, current, and expected)
- Fire behavior (previous, current, and expected)

#### Mission/Execution:

- Command (Incident Commander/immediate supervisor)
- Leader's intent
- Specific tactical assignments
- Contingency plans

### Communications:

- Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
- Medevac Plan

#### Service/Support:

- Other resources that may be working adjacent to you and those available to order
- Aviation operations
- Logistics (e.g., transportation, supplies, equipment)

## Risk Management:

- Identify known hazards and risks
- Identify control measures to eliminate hazards and reduce risk
- Identify trigger points for disengagement or reevaluation of operational plan

#### Resources:
