

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, March 27, 2020 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity (March 20 – March 26, 2020)**

Initial attack activity:	Light (312 new fires)
New large incidents:	2
Large fires contained:	4
Uncontained large fires:***	0
Area Command teams committed:	3
NIMOs committed:	2
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Nationally, there are 0 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Understanding the IMSR.

This report will post every Friday at 0800 Mountain Time unless significant activity occurs.

Area Command teams (Team 1 Stutler, Team 2 Sexton and Team 3 Jalbert) along with IMT2 (EA Silver Team) have been assigned by the National Multi-Agency Coordinating Group (NMAC) to develop a national COVID-19 wildland fire response plan.

NIMO (Day) has been assigned to Forest Service Region 5 COVID-19 Support.

NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington D.C.

IMT1 (NW Team 2) has been assigned to WA State EOC, providing complexity analysis, risk assessments and short/long-term planning guidance.

IMT2 (NW Team 13) has been assigned to the Spokane Regional Health District, WA assisting with strategic planning and building capacity.

### Active Incident Resource Summary

\*\*\*Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

**Predictive Services Discussion:** Critical fire weather conditions along the state lines of Texas, Oklahoma, New Mexico, and Colorado due to high southwesterly winds and low humidities may be offset by greening fuel conditions on Friday as a strong cold front passes. Following a brief warming trend in the West, scattered storms are expected Sunday across the Great Basin and the Northern Rockies as a weak cold front passes and cools temperatures. A warming and drying trend will begin again across the West Monday and last through Wednesday as a weakening high pressure ridge moves over the area and is eventually flattened by another approaching system on Thursday. Expect more scattered rain and snow showers over the mountains from Northern California and Nevada north into Canada as it passes. In the East, widespread showers and storms are expected across the entire eastern half of the country Tuesday and Tuesday night, including Florida, as a strong cold front passes.

## My Safety

Leadership Category

**An important aspect of safety is individual responsibility for one's own health and safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility is taught as the basis for a viable safety program. Some of those individual responsibilities are:**

- Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training is the foundation of "My Safety".
- Utilization of personal protective equipment (PPE). Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified that can be mitigated by wearing a particular PPE component it should be utilized. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- Following safe work practices. Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, ask your supervisor or an experienced coworker.
- Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the Red Book, IRPG, and your local operating guidelines.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place yourself or others at risk.
- Maintain situational awareness at all times. Awareness is a vital component of "My Safety". Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

**Summary: Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.**

### Discussions Points:

- Talk about ways you can improve your safety.
- Have your supervisor talk about their expectations for individual safety.
