

**National Interagency Coordination Center
Incident Management Situation Report
Monday, April 27, 2020 – 0800 MT
National Preparedness Level 1**

National Fire Activity (April 24 – April 26, 2020)

Initial attack activity:	Light (186 new fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires:***	4
Area Command teams committed:	3
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires: 30
 New large incidents: 0
 Uncontained large fires: 3

Holcombe Rd, Texas A&M Forest Service. Started on private land thirty-four miles southwest of Ozona, TX. Brush and tall grass. Minimal fire behavior with creeping and smoldering. Numerous structures threatened.

Silverking, Big Cypress National Preserve, NPS. Forty miles west of Coral Springs, FL. Timber and southern rough. Minimal fire behavior with creeping and smoldering.

* **Sunday Afternoon**, Florida Forest Service. Five miles southwest of Tamiami, FL. Timber, brush and tall grass. Minimal fire behavior with creeping and smoldering. Reduction in acreage due to more accurate mapping.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Borderline critical fire weather conditions are expected continue along the Mexican Border today with New Mexico and Arizona as a passing weak disturbance creates breezy southwesterly winds to go along with mid-single digit humidities this afternoon. A dry, weak offshore flow will continue along the coast of Southern California. Across the Great Basin expect breezy westerly winds to develop this afternoon. In the Pacific Northwest and Northern Rockies, a passing cold front will bring scattered showers to the mountains. Most valley locations will be rain shadowed out of precipitation due to a strong westerly wind flow. In the East, warm and dry conditions have redeveloped for Florida. The Mid-Atlantic States can expect dry and breezy northwesterly winds in the wake of yesterday's frontal passage. This is a trend that is expected to continue for then next week or two. Cooler than average temperatures along with dry conditions are expected across Alaska as a dry northwesterly flow continues.

LEAD Time

Leader's Intent

Leadership Category

In fast-moving, dynamic situations, top-level decision makers cannot always incorporate new information into a formal planning process and redirect people to action within a reasonable timeframe.

We provide leader's intent so people closest to the scene of action can adapt plans and exercise initiative to accomplish the objective when unanticipated opportunities arise or when the original plan no longer suffices.

Leader's intent is a crucial element of effective operations because it reduces internal friction and empowers subordinates – even when chaotic conditions prevent the chain of command from communicating effectively.

Leader's intent is a clear, concise statement about what people must do to succeed in their assignments. It delineates three essential components:

1. **Task** - what is the objective or goal of the assignment?
2. **Purpose** – why the assignment needs to be done.
3. **End state** – how the situation should look when the assignment is successfully completed.

Within the framework of the defined end state, leaders can develop plans that include incident objectives, priorities, strategies, trigger points, and contingency plans.

Discussion Points

- How were you most recently provided leader's intent?
- Describe a situation where leader's intent was utilized to adapt and achieve the desired end state.
- Describe a situation where leader's intent was not clear.
- Discuss how to gain leaders intent if it is not initially provided.
