

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, May 5, 2020 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (119 new fires)
New large incidents:	0
Large fires contained:	2
Uncontained large fires:***	0
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there is 1 large fire being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: A high pressure ridge will move inland from the West Coast bringing warm and dry conditions to areas from the western Great Plains through the Great Basin. Humidity levels down into the lower single digits are expected across Arizona and southern Nevada. Isolated storms will be possible across NE Oregon, Central Idaho, and along the Continental Divide from Montana south into Colorado. In Alaska, drier conditions are expected as a ridge of high pressure over the Yukon Territory strengthens westward across the Interior. Showers along the northern Gulf Coast should end by mid-day. Of note, a pool of tropical moisture will pool over northeastern Mexico and will be available to move up into eastern portions of the southwest later this week into next week.

The 10 Standard Fire Orders

Operational Engagement Category

The orders are arranged according to their importance and grouped in a logical sequence. Review and consider Standard Fire Orders as a part of every shift.

- Did you receive or request an adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, and/or local factors?
- Do you have a map of the fire? Are topography, type of fuels, and direction of the spread defined?
- The Fire Behavior group deals with what the firefighter will encounter - weather, fire status, and fire behavior.
 1. Keep informed on fire weather conditions and forecasts.
 2. Know what your fire is doing at all times.
 3. Base all actions on current and expected behavior of the fire.
- Are you familiar with direction, distance, location, size of escape routes, and safety zones?
- Discuss the need for a lookout, such as extreme fire behavior, and fire located out of line-of-sight.
- Discuss the importance of situational awareness.
- The Fireline Safety group emphasizes personal safety.
 4. Identify escape routes and safety zones, and make them known.
 5. Post lookouts when there is a possible danger.
 6. Be alert. Keep calm. Think clearly. Act decisively.
- Review the importance and means of passing tactical decisions and resource movement.
- Review other factors influencing potential changes in tactics, which could affect control of your forces.
- The Organizational Control group is centered around tactical decisions.
 7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
 8. Give clear instructions and ensure they are understood.
 9. Maintain control of your forces at all times.
- After you have considered, discussed and acted on the previous nine orders:
 10. Fight fire aggressively, having provided for safety first.
