

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 9, 2020 – 0730 MT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (105 new fires)
New large incidents:	2
Large fires contained:	0
Uncontained large fires:***	19
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

Nationally, there are 13 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires: 18
New large incidents: 2
Uncontained large fires: 12
Type 1 IMTs committed: 2

Bighorn, Coronado NF, USFS. IMT 1 (SW Team 2). Three miles southeast of Oro Valley, Arizona. Brush and tall grass. Active fire behavior. Structures threatened. Road, trail and area closures in effect.

Sawtooth, Tonto National Forest, USFS. Transfer of command from IMT 1 (SW Team 1) back to the local unit will occur today. Seven miles northwest of Superior, AZ. Brush and short grass. Minimal fire behavior. Road, trail and area closures in effect.

Blue River, San Carlos Agency, BIA. Eight miles northeast of San Carlos, AZ. Brush and tall grass. Active fire behavior with uphill and wind-driven runs. Structures threatened.

Tortolita, Southeast District, Arizona DOF. Seven miles northwest of Catalina, AZ. Brush and short grass. Minimal fire behavior with smoldering. Numerous residences threatened. Road closures in effect.

Emigrant, Coronado NF, USFS. Twenty-five miles southeast of Willcox, AZ. Brush and tall grass. Moderate fire behavior with running, flanking and backing. Residences threatened.

Dry Lake, San Carlos Agency, BIA. Thirty-four miles east of San Carlos, AZ. Brush, tall grass and timber litter. Moderate fire activity with flanking, backing and uphill runs. Structures threatened.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber and brush. Active fire behavior with uphill runs, backing and flanking. Structures threatened. Road, trail and area closures in effect.

Fort Craig, Socorro Field Office, BLM. Started on Bureau of Reclamation land one mile south of Fort Craig, NM. Chaparral and hardwood litter. Minimal fire behavior with smoldering and creeping.

Bringham, Apache-Sitgreaves NF, USFS. Twenty-five miles north of Morenci, AZ. Brush and timber litter. Moderate fire behavior with single tree torching and wind-driven runs.

* **Turkey**, Gila NF, USFS. Twenty-seven miles northwest of Mimbres, NM. Timber, brush and tall grass. Moderate fire behavior with flanking, backing and creeping.

Rafael, Southeast District, Arizona DOF. Fifteen miles southeast of Nogales, AZ. Brush and tall grass. No new information.

Farm Camp, Las Vegas District, New Mexico State Forestry Division. Five miles southeast of Mosquero, NM. Tall grass. No new information. Last report unless new information is received.

* **Good**, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Moderate fire behavior with flanking, backing and creeping. Last narrative report unless signification activity occurs.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: High pressure along the West Coast will move inland to be over the Great Basin while another, much weaker cold front approaches the Pacific Northwest coast. Overall hot and dry conditions will continue across the Southwest. The remnants of Tropical Storm Cristobal will move north along the Mississippi River, creating scattered storms as far north as the Upper Peninsula of Michigan. To the east, the strong high pressure ridge will maintain its grip over much of the East, producing hot and dry conditions, except across Florida, where lingering tropical moisture will create widespread convection. In Alaska, widely scattered storms will redevelop in the afternoon and evening across the Interior as the unstable easterly flow continues.

ESCAPE ROUTES 3

Operational Engagement Category

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following during discussion of escape from possible entrapment.

- Have a plan that includes trigger points!
 - **Trigger Point:** An observable event that triggers a pre-determined action.
Example: Temperature reaches 98 Degrees and RH goes into single digits, the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
 - Has access to escape routes become more difficult as the day progresses?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
- During an escape, time will be short. Describe considerations you might make in this situation such as:
 - Maintain control of all critical equipment such as PPE and radio... jettison gear that will not aid in your escape!
 - Maintain contact with all other crewmembers!
- Describe your vision of a good safety zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to safety zones and deployment areas.
