

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 14, 2020 – 0730 MT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (143 new fires)
New large incidents:	6
Large fires contained:	1
Uncontained large fires:***	27
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nationally, there are 19 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	13
New large incidents:	0
Uncontained large fires:	11
Type 1 IMTs committed:	1
Type 2 IMTs committed	2

Bighorn, Coronado NF, USFS. IMT 1 (SW Team 2). Five miles northeast of Tucson, AZ. Brush, tall grass and hardwood slash. Active fire behavior with uphill runs, running and group torching. Numerous structures threatened. Evacuations, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. IMT 2 (SW Team 4). Twenty-five miles north of Morenci, AZ. Brush and timber litter. Active fire behavior with short crown runs, backing and flanking. Structures threatened. Road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. IMT 2 (SW Team 3). Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Extreme fire behavior with short crown runs, torching and long-range spotting. Numerous structures and energy infrastructure threatened. Evacuations, road, trail and area closures in effect.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Moderate fire behavior with flanking, backing and isolated torching. Structures threatened. Road, trail and area closures in effect.

Blue River, San Carlos Agency, BIA. Eight miles northeast of San Carlos, AZ. Brush and tall grass. Moderate fire behavior with backing, creeping and smoldering. Structures threatened.

Dry Lake, San Carlos Agency, BIA. Thirty-four miles east of San Carlos, AZ. Brush, tall grass and timber. Moderate fire behavior with backing, creeping and isolated torching. Structures threatened.

Good, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Moderate fire behavior with backing, creeping and smoldering. Precipitation occurred over the fire area yesterday.

Emigrant, Coronado NF, USFS. Twenty-five miles southeast of Willcox, AZ. Brush and tall grass. Minimal fire behavior with smoldering. Residences threatened.

Canoa, Coronado NF, USFS. Twenty-five miles southwest of Tubac, AZ. Brush and tall grass. Minimal fire behavior with smoldering.

Farm Camp, Las Vegas District, New Mexico State Forestry Division. Five miles southeast of Mosquero, NM. Tall grass. Moderate fire behavior.

Sawtooth, Tonto NF, USFS. Seven miles northwest of Superior, AZ. Brush and short grass. No new information. Last report unless new information is received.

Predictive Services Discussion: Borderline critical fire weather conditions will continue across the Four Corner states as breezy winds, albeit less breezy than previous days, continue to interact with low humidities and convection along the Continental Divide. A weak cold front will move east across the Northern Rockies bringing scattered wet storms. Hot and dry conditions will continue across the Great Plains as high pressure over the central portion of the continent remains strong and highly amplified. Cool and wet conditions are expected in the East as a low pressure area and cold front sweep east across the Ohio River Valley. In Alaska, scattered convection will continue across the Interior. Most storms will be wet under the cores.

Frequent Spot Fires Across The Line

Weather - Fire Behavior Category

This watchout situation clearly indicates how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
- What is your probability of ignition doing? Is it increasing or decreasing?
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place, or order, to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, supervisors, etc.) and how you will get good information from that person. (Are you relying on an air attack that is busy with airtankers?)
- Where are you in the burning period? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
