# National Interagency Coordination Center Incident Management Situation Report <br> Monday, June 15, 2020 - 0730 MT <br> National Preparedness Level 2 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (169 new fires)
9
2

Nationally, there are 19 large fires being managed under a strategy other than full suppression.
*** Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington D.C.

## Southwest Area (PL 4)

New fires: 24
New large incidents: 1
Uncontained large fires: 10
Type 1 IMTs committed: 1
Type 2 IMTs committed 3
Mangum, Kaibab NF, USFS. IMT 2 (SW Team 3). Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Extreme fire behavior with short crown runs, torching and long-range spotting. Numerous structures and energy infrastructure threatened. Evacuations, road, trail and area closures in effect.

Bighorn, Coronado NF, USFS. IMT 1 (SW Team 2). Five miles northeast of Tucson, AZ. Brush, tall grass and hardwood slash. Active fire behavior with short crown runs, running and group torching. Numerous structures and energy infrastructure threatened. Evacuations, trail and area closures in effect.

* Bush, Tonto NF, USFS. IMT 2 (SW Team 5) mobilizing. Thirty-eight miles northeast of Mesa, AZ. Brush and tall grass. Extreme fire behavior with spotting and running.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. IMT 2 (SW Team 4). Twenty-five miles north of Morenci, AZ. Brush and timber litter. Active fire behavior with uphill runs, backing and creeping. Structures threatened. Road, trail and area closures in effect.

Blue River, San Carlos Agency, BIA. Eight miles northeast of San Carlos, AZ. Brush and tall grass. Moderate fire behavior with creeping and smoldering.

Dry Lake, San Carlos Agency, BIA. Thirty-four miles east of San Carlos, AZ. Brush, tall grass and timber. Minimal fire behavior with creeping and smoldering. Structures threatened.

Good, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Minimal fire behavior with backing, creeping and smoldering.

Emigrant, Coronado NF, USFS. Twenty-five miles southeast of Willcox, AZ. Brush and tall grass. Minimal fire behavior. Residences threatened.

Farm Camp, Las Vegas District, New Mexico State Forestry Division. Five miles southeast of Mosquero, NM. Tall grass. No new information.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information. ***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Slightly cooler temperatures are expected across the West as a weak but large trough moves east across the western half of the country. While critical fire weather conditions are not expected, ongoing warm and extremely dry conditions will continue across Arizona and the southern portion of the Great Basin. Isolated dry and wet convection will remain possible along the Continental Divide from Colorado south to Mexico. The hot high pressure ridge over the Great Plains will begin to weaken as it moves east to the Mississippi River. Cool conditions will continue in the East as the low pressure area centered over the Virginias and Kentucky strengthens. In Alaska, the areal coverage of afternoon convection will diminish significantly and will be isolated and focused over the central interior.

## Helicopter Landing Area Safety <br> Aviation Category

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter. (Eye, hearing, head.)
- Always get the approval of a flight crewmember or the pilot before approaching an operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position. Do not run. Keep in pilot's field of vision at all times.
- Never go near the tail of helicopters.
- When loading helicopters in uneven terrain, always approach and depart from the downslope (lower) side and do not hold equipment overhead.
- Remove or secure loose articles prior to working around an operating helicopter.
- Do not reach up or chase after loose objects.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
