

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 16, 2020 – 0730 MT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (165 new fires)
New large incidents:	4
Large fires contained:	11
Uncontained large fires:***	26
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

Nationally, there are 17 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	9
New large incidents:	0
Uncontained large fires:	8
Type 1 IMTs committed:	1
Type 2 IMTs committed	3

Bush, Tonto NF, USFS. IMT 2 (SW Team 5). Thirty-eight miles northeast of Mesa, AZ. Brush and tall grass. Extreme fire behavior with wind-driven runs, flanking and torching. Numerous structures threatened. Evacuations, road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. IMT 2 (SW Team 3). Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Extreme fire behavior with short crown runs, torching and long-range spotting. Numerous structures and energy infrastructure threatened. Evacuations, road, trail and area closures in effect.

Bighorn, Coronado NF, USFS. IMT 1 (SW Team 2). Five miles northeast of Tucson, AZ. Brush, tall grass and hardwood slash. Active fire behavior with group torching, uphill runs and flanking. Numerous structures and energy infrastructure threatened. Evacuations, trail and area closures in effect.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Minimal fire behavior with creeping, smoldering and isolated torching. Structures threatened. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. IMT 2 (SW Team 4). Twenty-five miles north of Morenci, AZ. Brush and timber litter. Active fire behavior with uphill runs, backing and creeping. Structures threatened. Road, trail and area closures in effect.

Blue River, San Carlos Agency, BIA. Eight miles northeast of San Carlos, AZ. Brush and tall grass. Minimal fire behavior with creeping and smoldering.

Dry Lake, San Carlos Agency, BIA. Thirty-four miles east of San Carlos, AZ. Brush, tall grass and timber. Minimal fire behavior with creeping and smoldering.

Good, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Minimal fire behavior with backing and smoldering.

Predictive Services Discussion: The low pressure area coming into the Pacific Northwest will strengthen as it moves east toward the Northern Rockies. Widespread showers and storms are expected across both regions. Critical fire weather conditions are expected south of the moisture field across the Central Great Basin as gusty westerly winds interact with low humidity levels. The critical, breezy conditions will extend south into central Arizona. Isolated convection will be possible along the Rocky Mountain Front in Colorado and New Mexico. Some storms could be dry. In the East, a strong and large low pressure area will keep much of the region cool and moist from Maryland south to Florida. In Alaska, widely scattered storms will be possible west of Fairbanks while scattered showers will be possible elsewhere.

Hazard Tree - Risk Management

Felling Safety Category

Consider the **severity, probability, and exposure** of **hazard tree** problems continually as you perform duties in forested communities. Remember to look for hazard tree risks at staging areas, parking areas, and camping areas.

● Environmental Element:

- Existing winds and forecast.
- Night operations or low visibility situations limiting your view of surroundings.
- Steep slopes.
- Diseased or bug-kill areas with high densities of dead or dying trees.
- Number, density, and height of hazard trees.
- Amount of time the area has been burning – burn down time.
- Potential for domino effect to surrounding trees.

● Hazard Tree Indicators:

- Trees burning for any period of time.
- High-risk tree species (rot and shallow roots).
- Numerous downed trees in the area.
- Dead, broken, or burning tops and limbs overhead.
- Accumulation of downed limbs.
- Fungus or growth of decay species on the tree.
- Cavities or evidence of woodpecker damage.
- Forked tops, multiple tops, and/or uneven branch distribution.
- Absence of needles, bark, or limbs.
- Leaning or hung-up.

● Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment.
- Avoid hazards by designating “No Work Zones” (NWZ) – (flag, sign, and map).
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area.
- Post lookouts to help maintain a secure area.
- Fireproof potential hazard trees to prevent ignition.
- Initiate road/traffic control and area closure.
- Keep clear of bucket drops near trees/snags.
- Establish trigger points for reposition to secure areas in response to high winds.
- Minimize exposure time in hazard tree areas using efficient felling techniques and limiting numbers of personnel in hazardous areas.
