

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 24, 2020 – 0730 MT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (100 new fires)
New large incidents:	3
Large fires contained:	3
Uncontained large fires:***	18
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

Nationally, there are 16 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	6
New large incidents:	2
Uncontained large fires:	11
Type 1 IMTs committed:	2
Type 2 IMTs committed	1

Bighorn, Coronado NF, USFS. IMT 1 (NR Team 1). Five miles northeast of Tucson, AZ. Chaparral, brush and timber. Active fire behavior with uphill runs, backing and short-range spotting. Numerous structures threatened. Evacuations, road, trail and area closures in effect.

Bush, Tonto NF, USFS. IMT 1 (SW Team 1). IMT is also managing the Central fire. Thirty-eight miles northeast of Mesa, AZ. Brush and tall grass. Moderate fire behavior with uphill runs, backing and short-range spotting. Road, trail and area closures in effect.

Central, Tonto NF, USFS. Four miles east of New River, AZ. Brush and short grass. Minimal fire behavior with backing, creeping and smoldering. Road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. IMT 2 (SW Team 3). Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Moderate fire behavior with running, flanking and torching. Numerous structures and energy infrastructure threatened. Evacuations, road, trail and area closures in effect.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Moderate fire behavior with backing and flanking. Structures threatened. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. Twenty-two miles north of Morenci, AZ. Brush, short grass and timber. Active fire behavior with uphill runs, flanking and backing. Structures threatened. Road, trail and area closures in effect.

* **Aquila**, Central District, Arizona DOF. One mile east of Tramonto, AZ. Chaparral, brush and short grass. Extreme fire behavior with short-range spotting, wind-driven runs and running. Numerous structures threatened. Evacuations, road and area closures in effect.

Good, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Moderate fire behavior with creeping, backing and smoldering.

* **Airport**, Buenos Aires NWR, FWS. Eight miles north of Sasabe, AZ. Brush and tall grass. Minimal fire behavior with smoldering.

Blue River, San Carlos Agency, BIA. Eight miles northeast of San Carlos, AZ. Brush and tall grass. No new information. Last report unless new information is received.

Dry Lake, San Carlos Agency, BIA. Thirty-four miles east of San Carlos, AZ. Brush, tall grass and timber. No new information. Last report unless new information is received.

Predictive Services Discussion: A cold front will cross the Pacific Northwest in the morning and will bring scattered storms to areas east of the Cascade Crest all the way to the Continental Divide. Significant lightning is expected. Some of the storms across Southern Oregon and Northern Nevada will be dry. Widely scattered storms will be possible along the Continental Divide south from Wyoming to the Mexican border. These storms will be a mix of wet and dry. Hot and dry conditions will continue across a majority of the Southwest, Southern California, and Southern Nevada. In the East, a large low pressure area will drift east into Ontario and Quebec and will bring showers to New England. In Alaska, scattered storms will be possible across the southern Interior and across the Chugach and Wrangell/St. Elias Ranges.

NFDRS PocketCards

Weather - Fire Behavior Category

The NFDRS PocketCard is a tool for field personnel to locally track outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season. It is based on current and historical weather for a localized area and the area's historic fire occurrence. The PocketCard displays a general assessment of the fire potential and identifies combinations of local weather and fuel conditions that might contribute to severe fire behavior.

The PocketCard provides:

- A general indicator of the potential fire danger for a given rating or protection area.
- A graph showing the trend and status of the current year's fire season.
- A comparison of current year conditions to historical worst and average conditions.
- Fire danger values related to past large or problem fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures associated with large or problem fires.

Discuss the following ways to use the PocketCard:

- Use it primarily before fires occur, before arriving at a fire. It is also useful during initial fire size-up, initial attack, and extended attack.
- Use it to learn of critical thresholds that predict the potential for extreme fire behavior for the local area. Be aware that local critical thresholds may be occurring earlier in the season.
- Use it to compare current and predicted local fire danger to historical local fire danger to enhance situational awareness.
- Use it to track daily fire danger indices that gauge the potential for weather and fuels to support extreme fire behavior, and of the difficulty of control.
- Use it to supplement local experience.
- Use it as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive a fire assignment outside your local area, visit the National PocketCard website at <https://famit.nwcg.gov/applications/WIMS/PocketCards> where PocketCards are filed by Geographic Area.
- Put it in the pocket of all your firefighters and keep one in your fire vehicle.
- Post it in dispatch. Use them in briefings. Provide them to incoming crews.
- **Do not use the PocketCard for site specific fire behavior predictions and fireline actions or without an interpretive briefing.**
- Review definitions and implications of ERC (energy release component) and BI (burning index) values.
