

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 28, 2020 – 0730 MT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (149 new fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires:***	17
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Nationally, there are 19 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	20
New large incidents:	0
Uncontained large fires:	8
Type 1 IMTs committed:	1
Type 2 IMTs committed	1

Bighorn, Coronado NF, USFS. IMT 1 (NR Team 1). Five miles northeast of Tucson, AZ. Chaparral, brush and timber. Active fire behavior with uphill runs, backing and short-range spotting. Numerous structures threatened. Evacuations, road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. Twenty-two miles north of Morenci, AZ. Brush, short grass and timber. Active fire behavior with wind-driven runs, flanking and backing. Structures threatened. Road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. IMT 2 (SW Team 3). Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Minimal fire behavior with creeping, torching and smoldering. Numerous structures and energy infrastructure threatened. Evacuations, road, trail and area closures in effect.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Minimal fire behavior with backing and flanking. Structures threatened. Road, trail and area closures in effect.

Vics Peak, Cibola NF, USFS. Thirty miles north of Truth or Consequences, NM. Active fire behavior with short crown runs, wind-driven runs and backing. Road, trail and area closures in effect.

Central, Tonto NF, USFS. Four miles east of New River, AZ. Brush and short grass. Minimal fire behavior with smoldering. Road, trail and area closures in effect.

Good, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Moderate fire behavior with backing, creeping and smoldering.

Bush, Tonto NF, USFS. Thirty-eight miles northeast of Mesa, AZ. Brush and tall grass. No new information.

Uncontained large fires:	6

* **Miller**, Ely District, BLM. Thirty-one miles northeast of Pioche, NV. Brush, chaparral and short grass. Extreme fire behavior with crowning, group torching and spotting. Structures and sage-grouse habitat threatened.

Twin, Ely District, BLM. Twelve miles northeast of Alamo, NV. Chaparral, brush and tall grass. Extreme fire behavior with spotting, wind-driven runs and running. Road, trail and area closures in effect.

* **Roc**, Manti-La Sal NF, USFS. Sixteen miles northeast of La Sal, UT. Timber, brush and slash. Active fire behavior with uphill runs, group torching and spotting. Structures threatened. Road closures in effect.

Rock Path, Richfield Field Office, BLM. Fifteen miles north of Milford, UT. Chaparral, brush and short grass. Active fire behavior with group torching, wind-driven runs and uphill runs. Structures threatened.

Monarch, Carson City District, BLM. Started on BIA land 11 miles southeast of Gardnerville, NV. Timber and tall grass. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Brown, Ely District, BLM. Two miles southeast of Lund, NV. Timber, brush and tall grass. Minimal fire behavior with smoldering and creeping.

Predictive Services Discussion: Today is an extreme day. Highly critical fire weather conditions are expected across the Great Basin and the Southwest as a potent cold front moves southeast across Nevada, Utah, and Eastern Idaho. Very windy conditions will develop by early afternoon and persist through the evening. Westerly wind speeds of 40 mph with gusts to 60 mph sustained behind the front across the northwestern half of Nevada along with humidities in the mid-teens to lower 20% range will create a critical environment. Highest winds will be observed on the ridges, west-east oriented canyons, and in the saddles across northeastern Nevada, northwestern Utah and southeastern Idaho where sustained winds may approach 50 mph with gusts to near 70 mph. Humidity levels will generally be in the teens except in the 30+% range in southeastern Idaho and northern Utah. Some portions of northeastern Nevada can also expect slightly higher humidities as well.

Critical conditions are also expected across southern Nevada, southeastern California (including the southern Sierra), northern Arizona, and southern Utah as a windy southwesterly flow interacts with humidities ranging from the upper single digits to the mid-teens. In these areas southwesterly winds will generally blow in the 25-35 mph range with gusts to around 45 mph. Higher winds will be possible in the southern Sierra and in the Arizona Strip country. Borderline critical fire weather conditions are expected across Colorado and New Mexico with breezy southwesterly winds and low humidities. Isolated storms are expected along the Continental Divide in Colorado and scattered wet storms are expected across western Wyoming.

Looking elsewhere, cool and wet conditions are expected across the Northwest as the culprit low pressure area slowly moves east across Idaho. Showers and storms will bring needed moisture to New England. Scattered storms will be possible along the Mississippi River Valley and across the Southeast.

Helicopter Landing Zone Selection

Aviation Category

Consider the following points when selecting a landing zone for a helicopter:

- Locate a flat area that is of sufficient size for the helicopter you are expecting to land.
 - Type I -- Clear and level touchdown pad measuring 30 feet by 30 feet; safety circle measuring 110 feet in diameter.
 - Type II -- Clear and level touchdown pad measuring 20 feet by 20 feet; safety circle measuring 90 feet in diameter.
 - Type III -- Clear and level touchdown pad measuring 15 feet by 15 feet; safety circle measuring 75 feet in diameter.
- Choose an area clear of people, vehicles, and obstructions such as trees, poles, and especially overhead wires.
- The area must be free of stumps, brush, posts, large rocks, or anything over 18 inches high.
- Consider the wind direction. Helicopters land and take off into the wind.
- Choose an approach free of obstructions. Any obstruction should be relayed to the helicopter crew during initial radio contact.
- Remove or secure any loose items in and around the landing area such as trash, blankets, hats, or equipment.
- Wet down the landing area if dusty conditions are present.
