

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, July 1, 2020 – 0730 MT  
National Preparedness Level 3**

**National Fire Activity:**

Initial attack activity:	Light (137 new fires)
New large incidents:	4
Large fires contained:	5
Uncontained large fires:***	22
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nationally, there are 19 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

## **Southwest Area (PL 4)**

New fires:	9
New large incidents:	2
Uncontained large fires:	9
Type 1 IMTs committed:	1
Type 2 IMTs committed	1

**Wood Springs 2**, Navajo Region, BIA. IMT 2 (SW Team 5). Twelve miles northeast of Ganado, AZ. Timber, brush and grass. Active fire behavior with flanking, isolated torching and short-range spotting. Structures threatened. Road closures in effect.

**Bighorn**, Coronado NF, USFS. IMT 1 (NR Team 1). Five miles northeast of Tucson, AZ. Chaparral, brush and timber. Active fire behavior with flanking, backing and creeping. Numerous structures threatened. Evacuations, road, trail and area closures in effect.

**Bringham**, Apache-Sitgreaves NF, USFS. Twenty-two miles north of Morenci, AZ. Brush, short grass and timber. Moderate fire behavior with backing, flanking and smoldering. Structures threatened. Road, trail and area closures in effect.

**Mangum**, Kaibab NF, USFS. Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Residences threatened. Road, trail and area closures in effect.

**Vics Peak**, Cibola NF, USFS. Thirty miles north of Truth or Consequences, NM. Timber. Active fire behavior with short crown runs, wind-driven runs and backing. Road, trail and area closures in effect.

**Bush**, Tonto NF, USFS. Thirty-eight miles northeast of Mesa, AZ. Brush and tall grass. Minimal fire behavior. Road, trail and area closures in effect.

**Good**, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Moderate fire behavior with backing, creeping and smoldering.

**Tadpole**, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Minimal fire behavior with smoldering. Structures threatened. Road, trail and area closures in effect.

**Cub**, Gila NF, USFS. Fifteen miles southeast of Mogollon, NM. Timber, brush and tall grass. Moderate fire behavior with creeping, smoldering and backing.

### **Great Basin Area (PL 3)**

New fires: 4  
 New large incidents: 0  
 Uncontained large fires: 10  
 Type 2 IMTs committed 2

**Canal**, Central Area, Utah DOF. IMT 2 (GB Team 3). Started on private land five miles north of Oak City, UT. Brush and tall grass. Moderate fire behavior with creeping, backing and uphill runs.

**Mahogany**, Humboldt-Toiyabe NF, USFS. IMT 2 (GB Team 7). Seven miles northeast of Mt. Charleston, NV. Timber and brush. Moderate fire behavior with backing, creeping and smoldering. Residences threatened. Road, trail and area closures in effect. Reduction in acreage due to more accurate mapping.

**Knolls**, Salt Lake Field Office, BLM. Started on state land five miles south of Saratoga Springs, UT. Brush and grass. Minimal fire behavior with creeping and smoldering. Reduction in acreage due to more accurate mapping.

**Power Line**, Central Area, Utah DOF. Six miles north of Nephi, UT. Brush and short grass. Moderate fire behavior with creeping and isolated torching. Structures and energy infrastructure threatened. Reduction in acreage due to more accurate mapping.

**Miller**, Ely District, BLM. Thirty-one miles northeast of Pioche, NV. Brush, chaparral and short grass. Moderate fire behavior with backing, creeping and group torching. Structures and sage-grouse habitat threatened.

**Poeville Road**, Truckee Meadows Fire Protection District. Twelve miles northwest of Reno, NV. Brush and short grass. Minimal fire behavior.

**Twin**, Ely District, BLM. Twelve miles northeast of Alamo, NV. Chaparral, brush and tall grass. Moderate fire behavior with backing, creeping and group torching.

**Wire Pass**, Cedar City District, BLM. Twenty-five miles east of Kanab, UT. Brush and short grass. Minimal fire behavior with smoldering. Road, trail and area closures in effect.

**Roc**, Manti-La Sal NF, USFS. Sixteen miles northeast of La Sal, UT. Timber, brush and slash. Minimal fire behavior with creeping and smoldering. Structures threatened. Road, trail and area closures in effect.

**Rock Path**, Richfield Field Office, BLM. Fifteen miles north of Milford, UT. Chaparral, brush and short grass. Minimal fire behavior with smoldering and creeping. Structures threatened.

**Predictive Services Discussion:** Breezy and dry conditions are expected across the northern Great Basin and southern Oregon as a westerly flow develops and intensifies ahead of a low pressure area approaching from British Columbia. Scattered storms will redevelop over the Northern Rockies by afternoon. Hot and dry conditions will intensify over the eastern half of the Southwest as the Four Corner's High strengthens over West Texas and New Mexico. The previous day's weak monsoonal plume will move east into East Texas by afternoon. Warm and dry conditions are expected across the central Great Basin and California. Rain will continue across New England as the low pressure area remains stalled. In Alaska, the low pressure area over the western part of the state will remain stalled. This will keep the showery pattern going.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## Lessons vs Learning

by the Wildland Fire Lessons Learned Center

**Brushing Project - 2014** While working on a brushing project, a hand crew member was injured when saw fuel sprayed onto his face and into his eyes.  
**Lesson from Report:** “If the fuel is suspected to be pressurized, **open the fuel cap while holding a rag—or other covering—over it.** Hold the saw away from the face and look away while opening the fuel cap.”

**Willow Peak Fire - 2015** After cooling for 10 minutes, the saw would not start. He raised the chainsaw and twisted the tool-less cap of the gas tank. The tank was pressurized, which caused gas to spew out as a shooting stream with an associated vapor cloud. The gas saturated him and established a path of fuel that led to the burning snag. Second- and third-degree burns on his face, upper torso, arms, and airway.  
**From Report:** “We continue to learn the hard way. There is a lack of recognition within the firefighting community of prior incidents. A report of a fatality or serious injury can intensify the circulation of knowledge more than a “near miss” report.”

**Brushing Project - 2020** Suspicious of a vapor-lock, he set the saw aside for continued cooling. Several minutes later, the sawyer cautiously opened the saw’s fuel tank – a geyser occurred. Sawyer had anticipated the geyser and was able to reduce the volatility by careful placement of his hand over the fuel cap as he opened it. Even so, this incident still resulted in his (gloved) hand and chaps becoming soaked in saw gas.  
**From Report:** “When I eventually chose to open the fuel tank with the intention of inspecting both the fuel and the filter, ***I was cognizant of the potential for a fuel-geyser. This awareness was due to repeated discussions of this hazard over the last few years. Thanks to the repeated LLC discussions, I have developed a habit of covering the fuel cap with a gloved hand when opening.***”

## Discussion: How can you turn lessons into learning?

**Study the lessons. Take ACTION. Cover the cap.**

Have an idea? Have feedback? Share it.
