

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, July 11, 2020 – 0730 MT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (120 new fires)
New large incidents:	2
Large fires contained:	4
Uncontained large fires:***	24
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

Nationally, there are 10 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	14
New large incidents:	1
Uncontained large fires:	12
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

* **Ojo de Los Casos**, Cibola NF, USFS. Twenty miles southeast of Albuquerque, NM. Timber, brush and short grass. Moderate fire behavior with backing, creeping and flanking. Community of Chilili, NM threatened.

Bighorn, Coronado NF, USFS. IMT 2 (SW Team 4). Five miles northeast of Tucson, AZ. Timber, brush and short grass. Moderate fire behavior with backing, creeping and smoldering. Road, trail and area closures in effect.

Monument, Northern District, Arizona DOF. Thirty miles northwest of Ash Fork, AZ. Brush and short grass. minimal fire behavior with backing and isolated torching.

Polles, Tonto NF, USFS. Transfer of command from IMT 1 (SW Team 2) back to the local unit will occur today. Thirteen miles west of Payson, AZ. Brush, short grass and slash. Minimal fire behavior with creeping and smoldering. Road, trail and area closures in effect.

Fresnal, Coronado NF, USFS. Ten miles southwest of Arivaca, AZ. Chaparral and tall grass. Minimal fire behavior with creeping and smoldering. Structures threatened. Precipitation occurred over the fire area yesterday.

Mangum, Kaibab NF, USFS. Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Residences threatened. Road, trail and area closures in effect.

Cub, Gila NF, USFS. Fifteen miles southeast of Mogollon, NM. Timber, brush and tall grass. Moderate fire behavior with backing, flanking and creeping.

Good, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Minimal fire behavior with smoldering.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Minimal fire behavior with smoldering. Structures threatened. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. Twenty-two miles north of Morenci, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Structures threatened. Road, trail and area closures in effect.

Vics Peak, Cibola NF, USFS. Thirty miles north of Truth or Consequences, NM. Timber. Moderate fire behavior with single tree torching, creeping and smoldering. Road, trail and area closure in effect.

Wood Springs 2, Navajo Region, BIA. IMT 2 (SW Team 5). Thirteen miles northeast of Ganado, AZ. Timber and brush. No new information.

 New large incidents: 0
 Uncontained large fires: 5
 Type 2 IMTs committed: 1

Numbers, Carson City District, BLM. IMT 2 (GB Team 4). Started on BIA land ten miles southeast of Gardnerville, NV. Chaparral, brush and short grass. Moderate fire behavior with flanking, backing and single tree torching. Numerous residences and sage-grouse habitat threatened.

Meadow Valley, Ely District, BLM. Twenty-five miles south of Caliente, NV. Brush and grass. Active fire behavior with running and flanking. Structures threatened. Road closure in effect.

Canal, Central Area, Utah DOF. Transfer of command from IMT 2 (GB Team 3) back to the local unit occurred yesterday. Started on private land five miles north of Oak City, UT. Timber, brush and short grass. Minimal fire behavior with smoldering. Area closures in effect.

Twin, Ely District, BLM. Twelve miles northeast of Alamo, NV. Chaparral, brush and tall grass. Minimal fire behavior with single tree torching, creeping and smoldering.

Baker, Richfield District, BLM. Eighteen miles south of Fillmore, UT. Grass. No new information.

Predictive Services Discussion: The strength of the hot, high pressure ridge event over the Southwest and California will peak today as the Four Corners High reaches it's peak intensity before a brief weakening occurs tomorrow. Widely scattered storms will be possible across Arizona, Northwestern New Mexico, Colorado, South Central Wyoming, and Central Utah as a weak monsoonal surge comes up from the south. Breezy and dry conditions could lead to pockets of critical fire weather conditions across Oregon and Washington. Scattered storms will be possible across northern Minnesota and Wisconsin as a compact disturbance moves east toward the Great Lakes. Scattered storms will be possible across the Western Interior of Alaska as a cold front moves east across the state.

Hazard Mitigation Through Risk Management

Operational Engagement

Risk Management doesn't get in the way of doing the mission – *it is the way we do the mission*. The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

● Step 1 – Situational Awareness:

- Obtain information.
- Scout the fire.
- Identify hazards—those likely to result in a negative impact.
- Consider all aspects of current and future situations.
- Consider known historical problem areas. (Apply information from the Fire Danger PocketCard.)
- Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- Attempt to determine why discrepancies exist with information before proceeding.

● Step 2 – Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the [Incident Response Pocket Guide, PMS 461](#)) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.

● Step 3 – Hazard Control:

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, Lookouts, Communications, Escape Routes, and Safety Zones (LCES), utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.

● Step 4 – Decision Point (decision to accept or not accept the risk(s) associated with an action):

- Consider whether controls are in place for identified hazards, whether selected tactics are based on expected fire behavior and if instructions have been given and understood.
- Make certain the decision is made at the appropriate level; if not, then elevate to a higher level.
- Reject the action if the risk is unacceptable.

● Step 5 – Evaluation:

- Ensure controls are implemented and accomplished to standards.
- Supervise/evaluate the effectiveness of controls and decisions. Stay on top of the situation and adjust risk controls as necessary.
- Anticipate consequences of decisions; if controls do not work, determine the problem and derive a better solution.
- Adjust actions as the situation changes; maintain situational awareness at all times.
- Maintain feedback line.
