# National Interagency Coordination Center <br> Incident Management Situation Report <br> Sunday, July 19, 2020 - 0730 MT <br> National Preparedness Level 3 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (125 new fires)
4
3

```27
```011

4

Nationally, there are 13 large fires being managed under a strategy other than full suppression. *** Uncontained large fires include only fires being managed under a full suppression strategy.

Link to Geographic Area daily reports.
Link to Understanding the IMSR.
NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington, D.C.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to St. George, UT, in support of wildland fire operations in the Southwest, Rocky Mountain and Great Basin areas.

Southwest Area (PL 3)
New fires
New large incidents:
Uncontained large fires:
Type 2 IMTs committed:
Blue River 2, San Carlos Agency, BIA. IMT 2 (SW Team 4). Fifteen miles northeast of San Carlos, AZ. Timber, brush and tall grass. Moderate fire behavior with running, creeping and smoldering. Structures threatened. Road and area closures in effect.

Jackson, Gila District, BLM. Eighteen miles west of Pima, AZ. Brush and short grass. Minimal fire behavior with smoldering.

Cub, Gila NF, USFS. Fifteen miles southeast of Mogollon, NM. Timber, brush and tall grass. Minimal fire behavior with creeping and smoldering. Precipitation occurred over the fire area yesterday.

Trementina Canyon, Las Vegas District, New Mexico State Forestry Division. Fifteen miles northwest of Trementina, NM. Tall grass. Moderate fire behavior.

Bighorn, Coronado NF, USFS. Five miles northeast of Tucson, AZ. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. Twenty-two miles north of Morenci, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Structures threatened. Road, trail and area closures in effect.

Vics Peak, Cibola NF, USFS. Thirty miles north of Truth or Consequences, NM. Timber. No new information.
Polles, Tonto NF, USFS. Thirteen miles west of Payson, AZ. Brush, short grass and slash. No new information. Last report unless new information is received.

Yankee Joe, Tonto NF, USFS. Twenty miles north of Globe, AZ. Brush and tall grass. No new information. Last report unless new information is received.

Predictive Services Discussion: A back door cold front will drop south from central Canada into Montana and will produce a northeasterly flow that will allow for the development of scattered storms on the Continental Divide from Alberta south into Wyoming. Scattered monsoonal storms are expected once again across eastern Arizona, New Mexico, and Colorado. Some storms on the Mogollon Rim could be dry. Warm and dry conditions will persist along the West Coast. A strengthening cold front will move east from the Great Lakes region into New England. Scattered strong storms are expected. Slightly drier conditions are expected across Alaska as a weak ridge of high pressure begins to build into the Interior from the Southeast. Isolated storms will be possible in the Upper Yukon.

\title{
Proper Use of Trigger Points
}

\author{
Weather - Fire Behavior Category
}

Accurate situational awareness (SA) requires a constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watch Out Situations and establishing operational/environmental limits (trigger points) ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision-makers but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks and help you to determine and implement the proper course of action.
- Preplan! Don't wait until you're in the wrong place at the wrong time - with no time.
- Trigger points should be based on measurable factors such as:
- Relative Humidity (RH).
- Winds.
- Fire Behavior.
- Topographical boundaries.
- Time constraints/time of day.
- Time/distance to safety zones.
- Loss of suppression resources.
- Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change).
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See Risk Management, green pages in the Incident Response Pocket Guide, PMS 461):
- Gather information to assure good SA.
- Assess hazards to anticipate serious risks.
- Establish hazard controls to mitigate serious risks.
- Make decisions based on your ability to mitigate those serious risks.
- Evaluate the effectiveness of current actions.
- Command/Leadership responsibilities when changing tactics:
- Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command.
- Account for all your people.
- Make sure everyone knows and follows the new plan.

Southwest Area (PL 3)
New fires
New large incidents:
Uncontained large fires:
Type 2 IMTs committed:
Blue River 2, San Carlos Agency, BIA. IMT 2 (SW Team 4). Fifteen miles northeast of San Carlos, AZ. Timber, brush and tall grass. Moderate fire behavior with running, creeping and smoldering. Structures threatened. Road and area closures in effect.

Jackson, Gila District, BLM. Eighteen miles west of Pima, AZ. Brush and short grass. Minimal fire behavior with smoldering.

Cub, Gila NF, USFS. Fifteen miles southeast of Mogollon, NM. Timber, brush and tall grass. Minimal fire behavior with creeping and smoldering. Precipitation occurred over the fire area yesterday.

Trementina Canyon, Las Vegas District, New Mexico State Forestry Division. Fifteen miles northwest of Trementina, NM. Tall grass. Moderate fire behavior.

Bighorn, Coronado NF, USFS. Five miles northeast of Tucson, AZ. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. Twenty-two miles north of Morenci, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Structures threatened. Road, trail and area closures in effect.

Vics Peak, Cibola NF, USFS. Thirty miles north of Truth or Consequences, NM. Timber. No new information.
Polles, Tonto NF, USFS. Thirteen miles west of Payson, AZ. Brush, short grass and slash. No new information. Last report unless new information is received.

Yankee Joe, Tonto NF, USFS. Twenty miles north of Globe, AZ. Brush and tall grass. No new information. Last report unless new information is received.

Predictive Services Discussion: A back door cold front will drop south from central Canada into Montana and will produce a northeasterly flow that will allow for the development of scattered storms on the Continental Divide from Alberta south into Wyoming. Scattered monsoonal storms are expected once again across eastern Arizona, New Mexico, and Colorado. Some storms on the Mogollon Rim could be dry. Warm and dry conditions will persist along the West Coast. A strengthening cold front will move east from the Great Lakes region into New England. Scattered strong storms are expected. Slightly drier conditions are expected across Alaska as a weak ridge of high pressure begins to build into the Interior from the Southeast. Isolated storms will be possible in the Upper Yukon.

\title{
Proper Use of Trigger Points
}

\author{
Weather - Fire Behavior Category
}

Accurate situational awareness (SA) requires a constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watch Out Situations and establishing operational/environmental limits (trigger points) ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision-makers but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks and help you to determine and implement the proper course of action.
- Preplan! Don't wait until you're in the wrong place at the wrong time - with no time.
- Trigger points should be based on measurable factors such as:
- Relative Humidity (RH).
- Winds.
- Fire Behavior.
- Topographical boundaries.
- Time constraints/time of day.
- Time/distance to safety zones.
- Loss of suppression resources.
- Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change).
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See Risk Management, green pages in the Incident Response Pocket Guide, PMS 461):
- Gather information to assure good SA.
- Assess hazards to anticipate serious risks.
- Establish hazard controls to mitigate serious risks.
- Make decisions based on your ability to mitigate those serious risks.
- Evaluate the effectiveness of current actions.
- Command/Leadership responsibilities when changing tactics:
- Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command.
- Account for all your people.
- Make sure everyone knows and follows the new plan.

New fires
New large incidents:
Uncontained large fires:
Type 2 IMTs committed:
Blue River 2, San Carlos Agency, BIA. IMT 2 (SW Team 4). Fifteen miles northeast of San Carlos, AZ. Timber, brush and tall grass. Moderate fire behavior with running, creeping and smoldering. Structures threatened. Road and area closures in effect.

Jackson, Gila District, BLM. Eighteen miles west of Pima, AZ. Brush and short grass. Minimal fire behavior with smoldering.

Cub, Gila NF, USFS. Fifteen miles southeast of Mogollon, NM. Timber, brush and tall grass. Minimal fire behavior with creeping and smoldering. Precipitation occurred over the fire area yesterday.

Trementina Canyon, Las Vegas District, New Mexico State Forestry Division. Fifteen miles northwest of Trementina, NM. Tall grass. Moderate fire behavior.

Bighorn, Coronado NF, USFS. Five miles northeast of Tucson, AZ. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. Twenty-two miles north of Morenci, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Structures threatened. Road, trail and area closures in effect.

Vics Peak, Cibola NF, USFS. Thirty miles north of Truth or Consequences, NM. Timber. No new information.
Polles, Tonto NF, USFS. Thirteen miles west of Payson, AZ. Brush, short grass and slash. No new information. Last report unless new information is received.

Yankee Joe, Tonto NF, USFS. Twenty miles north of Globe, AZ. Brush and tall grass. No new information. Last report unless new information is received.

Predictive Services Discussion: A back door cold front will drop south from central Canada into Montana and will produce a northeasterly flow that will allow for the development of scattered storms on the Continental Divide from Alberta south into Wyoming. Scattered monsoonal storms are expected once again across eastern Arizona, New Mexico, and Colorado. Some storms on the Mogollon Rim could be dry. Warm and dry conditions will persist along the West Coast. A strengthening cold front will move east from the Great Lakes region into New England. Scattered strong storms are expected. Slightly drier conditions are expected across Alaska as a weak ridge of high pressure begins to build into the Interior from the Southeast. Isolated storms will be possible in the Upper Yukon.

\title{
Proper Use of Trigger Points
}

\author{
Weather - Fire Behavior Category
}

Accurate situational awareness (SA) requires a constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watch Out Situations and establishing operational/environmental limits (trigger points) ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision-makers but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks and help you to determine and implement the proper course of action.
- Preplan! Don't wait until you're in the wrong place at the wrong time - with no time.
- Trigger points should be based on measurable factors such as:
- Relative Humidity (RH).
- Winds.
- Fire Behavior.
- Topographical boundaries.
- Time constraints/time of day.
- Time/distance to safety zones.
- Loss of suppression resources.
- Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change).
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See Risk Management, green pages in the Incident Response Pocket Guide, PMS 461):
- Gather information to assure good SA.
- Assess hazards to anticipate serious risks.
- Establish hazard controls to mitigate serious risks.
- Make decisions based on your ability to mitigate those serious risks.
- Evaluate the effectiveness of current actions.
- Command/Leadership responsibilities when changing tactics:
- Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command.
- Account for all your people.
- Make sure everyone knows and follows the new plan.
